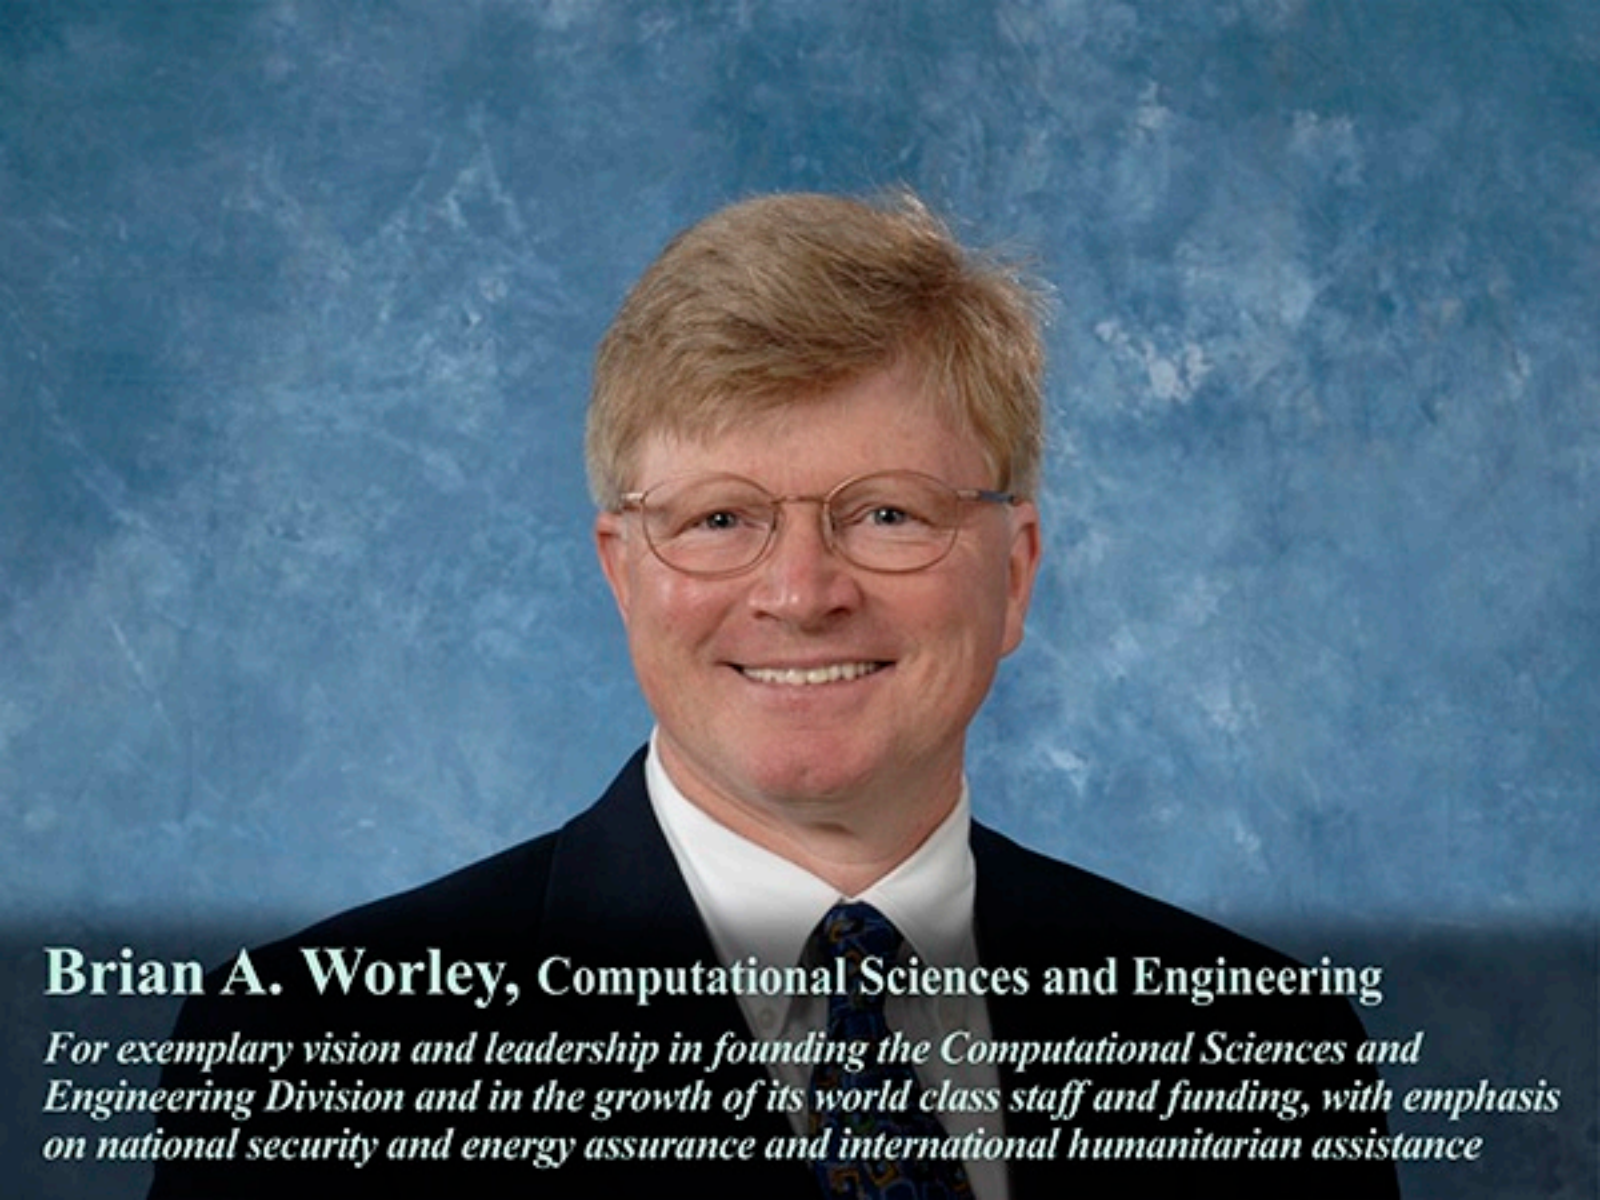
R&D Leadership

at the director level

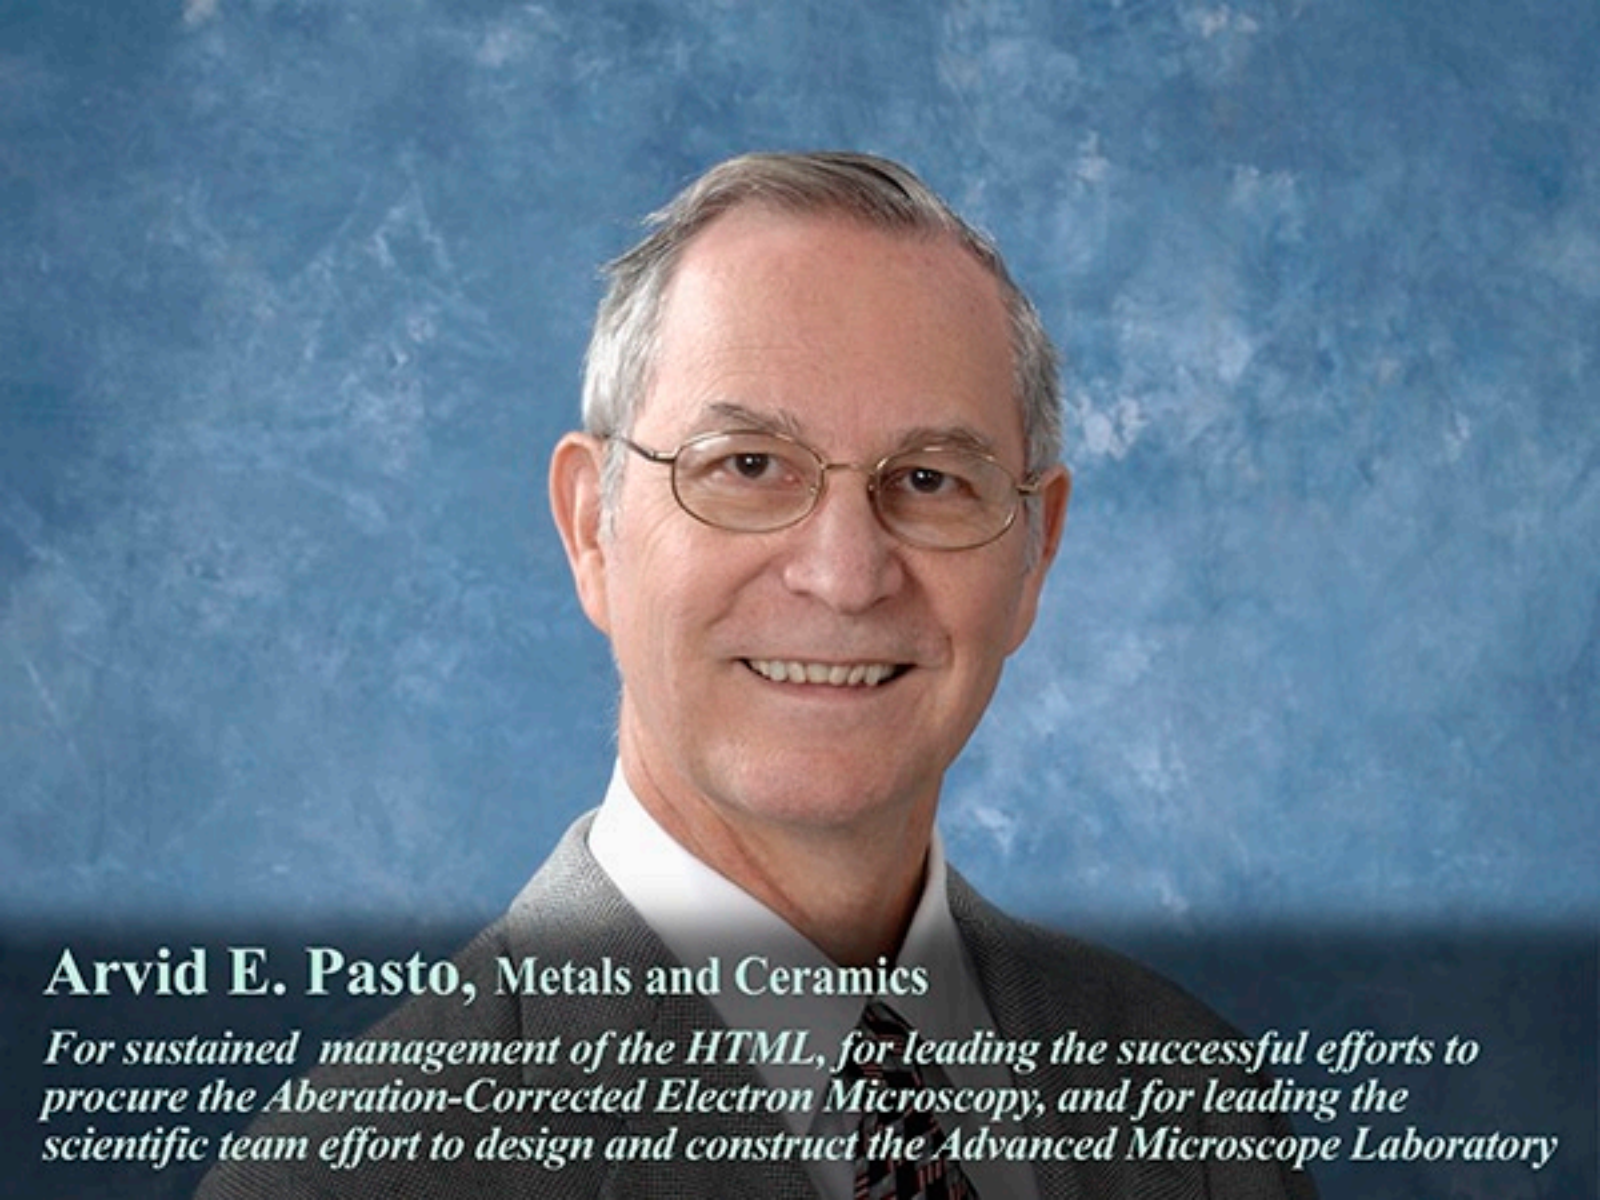


Brian A. Worley, **Computational Sciences and Engineering**

For exemplary vision and leadership in founding the Computational Sciences and Engineering Division and in the growth of its world class staff and funding, with emphasis on national security and energy assurance and international humanitarian assistance

Stanley L. Milora, Fusion Energy

For scientific and managerial excellence in leading the revitalization of the ORNL Magnetic Fusion Energy Science Program



Arvid E. Pasto, Metals and Ceramics

For sustained management of the HTML, for leading the successful efforts to procure the Aberation-Corrected Electron Microscopy, and for leading the scientific team effort to design and construct the Advanced Microscope Laboratory
