

In Celebration of Women's History Month

Remembering Miss Meitner

March 27, 2007 - 5:30 PM
at the American Museum of Science and Energy
Oak Ridge, Tennessee

A one-act drama about physics and betrayal
by
Robert Marc Friedman

In 1945, the Royal Swedish Academy of Sciences awarded the Nobel Prize in Chemistry to Otto Hahn for the discovery of nuclear fission, overlooking the physicist Lise Meitner, who collaborated with him in the discovery and gave the first theoretical explanation of the fission process.
