

*Distinguished
Scientist*

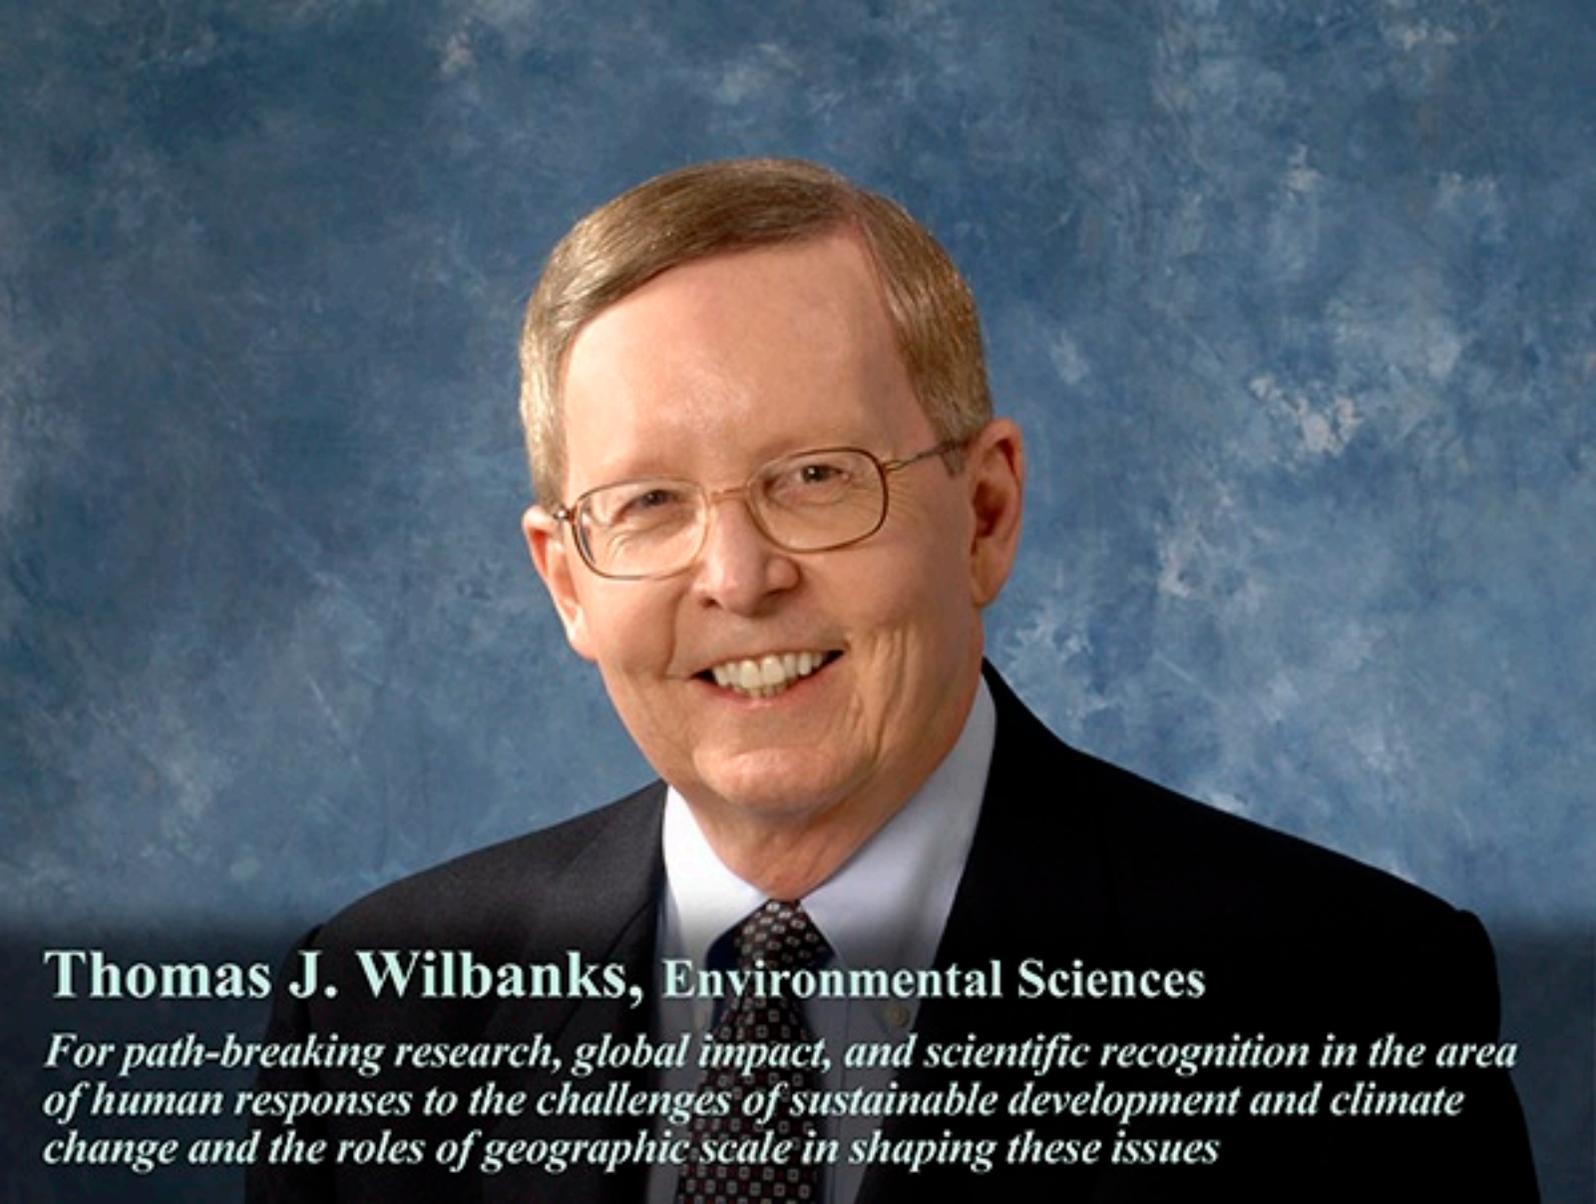

Lynn A. Boatner, Condensed Matter Sciences

For pioneering new approaches and techniques for growth, synthesis, and characterization of novel materials

George D. Wignall, Center for Neutron Scattering

For pioneering instrumentation development and sustained achievement in the structure of polymers through the use of small angle neutron scattering

Thomas J. Wilbanks, Environmental Sciences

For path-breaking research, global impact, and scientific recognition in the area of human responses to the challenges of sustainable development and climate change and the roles of geographic scale in shaping these issues
