

*Distinguished
Engineer*

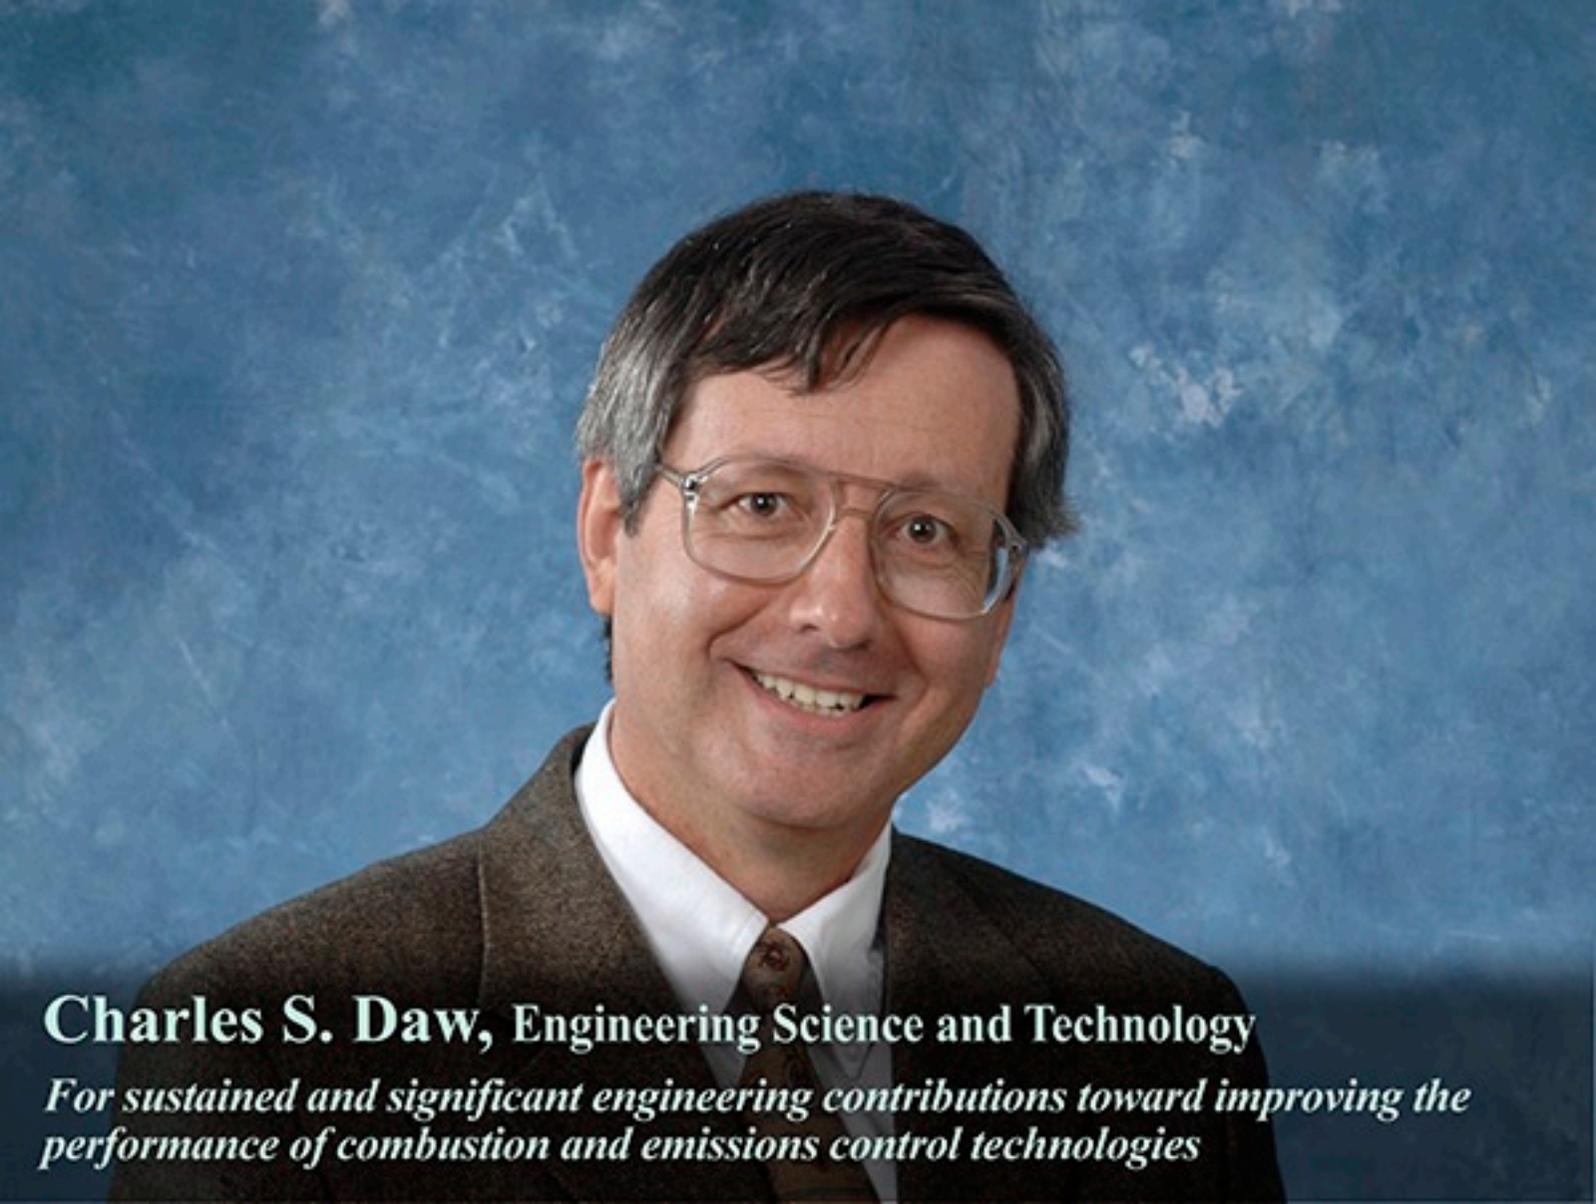

C. W. Forsberg, Nuclear Science and Technology

For sustained and significant contributions in the areas of reactor system concepts, reactor safety, waste management technology, and nuclear fuel disposition

Charles L. Britton, Jr., Engineering Science and Technology

For sustained leadership and innovation in the application of custom integrated circuits to a number of measurement and sensing fields

Charles S. Daw, Engineering Science and Technology

For sustained and significant engineering contributions toward improving the performance of combustion and emissions control technologies
