

R&D
Leadership
at the director level

Brian A. Worley, Computational Sciences and Engineering

For exemplary vision and leadership in founding the Computational Sciences and Engineering Division and in the growth of its world class staff and funding, with emphasis on national security and energy assurance and international humanitarian assistance

Stanley L. Milora, Fusion Energy

*For scientific and managerial excellence in leading the revitalization of the ORNL
Magnetic Fusion Energy Science Program*

Arvid E. Pasto, Metals and Ceramics

For sustained management of the HTML, for leading the successful efforts to procure the Aberration-Corrected Electron Microscopy, and for leading the scientific team effort to design and construct the Advanced Microscope Laboratory
