## **ABSTRACT**

This directory of 1074 individuals with an interest in, or involvement with, remedial actions at radioactively contaminated sites was prepared for the U.S. Department of Energy (DOE) remedial action programs, which are administered by the DOE Division of Facility and Site Decommissioning Projects and Division of Uranium Mill Tailings Projects through the Office of Remedial Action and Waste Technology. The remedial action programs comprise: Formerly Utilized Sites Remedial Action Program (FUSRAP), Grand Junction Remedial Action Program (GJRAP), Surplus Facilities Management Program (SFMP), and Uranium Mill Tailings Remedial Action Program (UMTRAP). This directory provides: a main listing, sorted by the contact's last name, giving name, address, and telephone number; a list of affiliations represented in the main listing, with individual contacts appearing below each affiliation name; two separate listings for each of the DOE remedial action programs, one sorted by the contact's last name and the other sorted by affiliation; and a listing of the foreign contacts sorted by country. The grouping of contacts by DOE programs is based on their response to a survey questionnaire; inclusion of a contact on a DOE program list does not imply any association or affiliation with the program.

This report was generated from the Remedial Action Contacts Database, an online, interactive database maintained by the Remedial Action Program Information Center. This report revises and updates the first directory, which was prepared in November 1983.

## **INTRODUCTION**

This directory of 1074 individuals with an interest in, or involvement with, remedial actions at radioactively contaminated sites was prepared for the U.S. Department of Energy (DOE) remedial action programs, which are administered by the DOE Division of Facility and Site Decommissioning Projects and Division of Uranium Mill Tailings Projects through the Office of Remedial Action and Waste Technology. The remedial action programs comprise: Formerly Utilized Sites Remedial Action Program (FUSRAP), Grand Junction Remedial Action Program (GJRAP), Surplus Facilities Management Program (SFMP), and Uranium Mill Tailings Remedial Action Program (UMTRAP). This directory provides: a main listing, sorted by the contact's last name, giving name, address, and telephone number; a list of affiliations represented in the main listing, with individual contacts appearing below each affiliation name; two separate listings for each of the DOE remedial action programs, one sorted by the contact's last name and the other sorted by affiliation; and a listing of the foreign contacts sorted by country. The grouping of contacts by DOE programs is based on their response to a survey questionnaire; inclusion of a contact on a DOE program list does not imply any association or affiliation with the program.

Three appendices are provided. Appendix A lists the general information or personnel locator telephone numbers for DOE operations and area offices and major DOE contractors involved in remedial action work at DOE-designated sites. Appendix B provides the mailing addresses for DOE operations and area offices and major DOE contractor offices involved in remedial action work. Appendix C lists many of the acronyms commonly used in remedial action and radioactive waste management work.

This report was generated from the Remedial Action Contacts Database, an online, interactive database maintained by the Remedial Action Program Information Center. This report revises and updates the first directory, which was prepared in November 1983.

## **REMEDIAL ACTION PROGRAM INFORMATION CENTER**

The Remedial Action Program Information Center (RAPIC) is part of Information Research and Analysis section of the Biology Division at Oak Ridge National Laboratory and is jointly funded by the DOE Division of Facility and Site Decommissioning Projects and Division of Uranium Mill Tailings Projects to provide technical information support to the DOE remedial action program under the sponsorship of the following:

- Surplus Facilities Management Program  
Lead Field Office—DOE Richland Operations Office  
Lead Technical Contractor—UNC Nuclear Industries, Inc., Office of Surplus Facilities Management (OSFM)

- Formerly Utilized Sites Remedial Action Program  
Lead Field Office—DOE Oak Ridge Operations Office  
Lead Technical Contractor—Bechtel National, Inc.
- Uranium Mill Tailings Remedial Action Program  
Lead Field Office—DOE Albuquerque Operations Office  
Lead Technical Contractor—Jacobs Engineering Group, Inc.
- Grand Junction Remedial Action Program  
Lead Field Office—DOE Grand Junction Area Office  
Lead Technical Contractor—Colorado Department of Health
- Technical Measurements Center  
Lead Office—DOE Grand Junction Area Office  
Lead Technical Contractor—Bendix Field Engineering Corporation

RAPIC's communications with DOE's remedial action programs are administratively coordinated through the Office of Surplus Facilities Management, UNC Nuclear Industries, Inc., Richland, Washington.

RAPIC serves as a central clearinghouse for information (derived from both foreign and domestic publications) concerning scientific, regulatory, and socioeconomic aspects of radioactively contaminated facility/site remedial actions. These remedial actions encompass such activities as:

- Performing characterization surveys of radioactively contaminated facilities or sites,
- Conducting ongoing security and surveillance programs,
- Performing preventive maintenance actions to ensure containment of radioactivity while awaiting permanent facility disposition,
- Assessing environmental and engineering aspects of proposed remedial action alternatives.
- Drafting detailed remedial action project plans and procedures, and
- Performing remedial actions to make facilities/sites available for restricted or unrestricted use.

RAPIC will perform online searches of the Remedial Action Contacts Database upon request. Output can consist of a computer printout or self-adhesive mailing labels. In addition to the information identified in this report, the database contains other searchable data fields with the following information: distribution list status, whether work is funded by DOE, major subject areas of interest, and job title or position in organization.

The primary database developed by RAPIC is the Nuclear Facility Decommissioning and Site Remedial Actions Database, an annotated bibliographic database of all identified documents pertinent to the DOE remedial action programs. RAPIC will perform topical searches of its databases, perform computerized literature searches of the commercially available databases, and provide assistance in locating hardcopies of documents referenced its bibliographies (e.g., *Nuclear Facility Decom-*

*missioning and Site Remedial Actions*, ORNL/EIS-154, volumes 1 through 6) free of charge to DOE remedial action program staff and their subcontractors.
