

**Genomes to Life Center for Molecular and Cellular Systems: A Research Program for  
Identification and Characterization of Protein Complexes**

**Table of Contents**

Proposal Cover Page	i
Field Work Proposal Page	iii
DOE Face Page	v
Table of Contents	vii
Abstract	1
Budget Pages and Budget Explanation	3
<b>1.0 Overview</b>	<b>37</b>
1.1 Budget Pages and Explanation	39
1.2 Introduction	51
1.3 The Center for Molecular and Cellular Systems: An Integrated Research Project for Protein Complex Identification and Characterization	53
1.4 Outline of the Center for Molecular and Cellular Systems	54
1.4.1 High Throughput Complex Processing	55
1.4.2 High Throughput Molecular Characterization	58
1.4.3 Molecular and Cellular Imaging for Complex Characterization	61
1.4.4 Computational Characterization of Protein Complex Structures and Functions	62
1.4.5 Impact of the Center for Molecular and Cellular Systems	64
1.5 Management Plan	65
1.5.1 Organizational Structure	65
1.5.2 Management of Research Subprojects	67
1.5.3 Communications and Outreach	68
1.5.4 Data and Information Management Plan	68
1.5.5 Project Initiation	69
1.5.6 Performance Measurement	69
1.6 Letters of Support	73
1.7 Literature Cited	81
<b>2.0 Genomes to Life Center for Molecular and Cellular Systems</b>	<b>85</b>
2.1 Budget Pages and Budget Explanation	87
2.2 Background and Significance	107
2.2.1 Rationale for Choice of Microorganisms	108
2.2.2 Purification of Protein Complexes	110
2.2.3 Identification of Isolated Proteins	110
2.3 Preliminary Studies	111
2.3.1 Identification of Candidate Proteins for Cloning and Expression	111
2.3.2 Bacterial Cell Growth and Differential Expression of Protein Complexes	112
2.3.3 Complex Purification	113
2.3.4 Protein Separation and Identification	114
2.4 Research Design and Methods	116
2.4.1 Specific Aim 1: Identify and Express Candidate Proteins Involved in Complex Formation	119
2.4.2 Specific Aim 2: Bacterial Cell Growth and Differential Expression of Protein Complexes	120
2.4.3 Specific Aim 3: Purify Protein Complexes Following Cellular Disruption and Fractionation	120

2.4.4	Specific Aim 4: Identify Proteins and Their Stoichiometries in Isolated Complexes	123
2.4.5	Specific Aim 5: Integrate Data Management and Protein Complex Analysis	125
2.5	Subcontract or Consortium Arrangements	126
2.6	Literature Cited	127
2.7	Letters of Support	131
2.8	Milestones	141
	Appendix	143
<b>3.0</b>	<b>High Throughput Complex Processing</b>	<b>145</b>
3.1	Budget Pages and Budget Explanation	147
3.2	Background and Significance	161
3.2.1	Current approaches for isolation of protein complexes	161
3.2.2	Development of a high throughput approach to analysis of protein complexes	163
3.2.3	Renewable surface isolation	164
3.2.4	Microfluidic devices for integrated processing and analysis of protein complexes	166
3.3	Preliminary Data	166
3.3.1	Generation of an scFv antibody library	166
3.3.2	Renewable surface-biomolecular interaction assay techniques	168
3.3.3	Use of microfluidic devices for sample preparation	169
3.4	Research Design and Methods	171
3.4.1	Overall technical approach	171
3.4.2	Specific Aim #1: To use high throughput selection of scFv antibodies in yeast to generate a comprehensive library of high affinity scFv antibodies suitable for isolation of protein complexes	171
3.4.3	Specific Aim #2: To develop a renewable surface microcolumn system compatible with isolation of protein complexes using immobilized scFv or other affinity matrixes and subsequent on-line digestion to generate peptides for mass spectrometric analysis	175
3.4.4	Specific Aim #3: Development of microfluidic devices for high throughput processing of protein complexes from microbial cells	178
3.4.5	Summary	179
3.5	Subcontract or Consortium Arrangements	181
3.6	Literature Cited	183
3.7	Letters of Support	187
3.8	Milestones	189
<b>4.0</b>	<b>High Throughput Molecular Characterization</b>	<b>191</b>
4.1	Budget Pages and Budget Explanation	193
4.2	Background and Significance	215
4.2.1	Extension of the Accurate Mass Tag Approach for Protein Identification	216
4.2.2	Scaling Mass Spectroscopy for High Throughput	217
4.3	Preliminary Studies	217
4.3.1	Crosslinking of Protein Complexes	220
4.4	Research Design and Methods	221
4.4.1	Increase the throughput, sensitivity and dynamic range of FTICR mass measurements to enable measurements	221
4.4.2	Approaches for Improved Throughput for MS of Complexes	225
4.4.3	Develop approaches for obtaining improved protein complex identifications, more accurate absolute protein abundance measurements and improved assessments of data quality	230
4.4.4	Develop approaches for obtaining improved protein identifications	232

4.5	Subcontract or Consortium Arrangements	234
4.6	Literature Cited	235
4.7	Letters of Support	241
4.8	Milestones	245
	Appendix	247
<b>5.0</b>	<b>Bioinformatics and Computing</b>	<b>249</b>
5.1	Budget Pages and Budget Explanation	251
5.2	Background and Significance	277
5.2.1	Characterization of protein-protein interactions and protein complexes	277
5.2.2	Current methods for identification of protein-protein interactions	278
5.2.3	Study of protein complexes using mass spectrometry and cross-linking	278
5.2.4	From experimental data to complex structures/functions: our vision	279
5.3	Preliminary Studies	280
5.3.1	Mass spectrometry data analysis capabilities	280
5.3.2	Computational inference of protein complexes	281
5.3.3	Bio-computing at ORNL	283
5.3.4	High-performance computing for molecular science at PNNL	284
5.4	Research Design and Methods	284
5.4.1	Task 1: Mass spectrometry data analysis and interpretation	285
5.4.2	Task 2: Protein complex characterization	287
5.4.3	Task 3: Protein complex database and collaborative computational environment	293
5.5	Subcontract or Consortium Agreements	297
5.6	Literature Cited	299
5.7	Letters of Support	305
5.8	Milestones	309
<b>6.0</b>	<b>Molecular and Cellular Imaging</b>	<b>311</b>
6.1	Budget Pages and Budget Explanation	313
6.2	Background and Significance	329
6.3	Preliminary Studies	331
6.3.1	Nano-Scale Probe Techniques	331
6.3.2	Optical Probing Techniques	333
6.4	Research Design and Methods	337
6.4.1	Studies of Protein Complexes in Isolated Complexes and Living Systems	338
6.4.2	Complexes on Cell Surfaces and Within Cell Cultures	346
6.5	Subcontract or Consortium Arrangements	348
6.6	Literature Cited	349
6.7	Letters of Support	355
6.8	Milestones	357
<b>7.0</b>	<b>Capital Equipment</b>	<b>359</b>
<b>8.0</b>	<b>Other Support of Investigators</b>	<b>361</b>
<b>9.0</b>	<b>Biosketches of Investigators</b>	<b>395</b>
<b>10.0</b>	<b>Facilities and Resources</b>	<b>519</b>
