Mr. Dalglish has been actively involved in the construction industry for over 32 years and has specialized in building envelopes, energy efficiency and building performance. Laverne is a frequent presenter across North America at international, national, state and industry conferences on a variety of topics as they relate to building enclosures, energy efficiency, green building practices, standards and quality of construction. Laverne has actively promoted a Building Science approach to building and renovating homes while keeping it practical. A lot of Laverne's work has been in transferring technology from research organizations, manufacturers and government agencies into products which can be understood and used by the contractors and installers. Laverne also provides technical support to design professionals, contractors, installers and consumers. Laverne has developed training courses for many construction products including insulation, windows, air barrier, exterior finish systems, insulated concrete forms, structural insulated panels, air sealing, siding and cladding, buildings assessments and various building science courses. Laverne has provided educational seminars for design professionals, contracting firms, government agencies and consumers. Laverne has spent a lot of time in standards development being the secretariat of two international committees, chair of two national committees and a member of six standards development organizations.
