Mr. Gonçalves is a professional engineer and senior building envelope consultant with over twenty years of field experience. Mario is the President of Patenaude-Trempe - a Montreal and Quebec City based building envelope consulting and testing firm with projects across eastern Canada and the north-eastern United States. Mario is also president of the Quebec Building Envelope Council (QBEC) and a director of the National Building Envelope Council of Canada (NBEC). Mario is actively involved in different standard and code development committees related to the building envelope, as such, he is a technical committee member of the Canadian CSA A440.4 "Window and Door Installation" standard as well as member of the Standing Committee on Energy Efficiency in Buildings for the Canadian Commission on Building and Fire Codes, where he chairs the building envelope task group. Mario's professional practice includes assisting architects with designing high performance building envelopes as well as investigating and field testing performance related problems associated primarily with the vertical building envelope (walls, windows and curtain walls) on mid to high-rise buildings.
