Throughout his 30 year career in building materials R&D, Frank has specialized in product development for both industrial and residential products & systems. He has worked on a range of products from appliance prototyping and vacuum insulations, to masonry cladding and roofing. He is currently a Senior Scientist at Owens Corning Science & Technology in Granville Ohio where his focus is on energy efficiency solutions for residential construction. Frank currently chairs the ASTM C16 Subcommittee on Thermal Insulation Measurement, and has published in related journals including Journal of Thermal Insulation and Journal of Cellular Plastics.
