Mr. Coulter graduated from Warren Wilson College in Asheville, NC in 1997 with a B.A. degree in Liberal Arts. He has a background based on hands on experience and experiential education in areas from vehicle maintenance and electric vehicle conversions, residential water systems, home construction and renovation, to energy efficiency, solar water and PV. At Advanced Energy he performs a variety of technical duties from new construction support in residential building diagnostic testing nationwide, providing training and consulting services to builders and building trades to existing home retrofit trainings and program technical support and quality assurance assistance.
