Manfred.kehrer@ibp.franhofer.de

Mr. Kehrer is a Group Manager for Software Development at Fraunhofer IBP. He graduated from the University of Applied Science in Munich, in Technical Physics in 1993 and has since been with Fraunhofer IBP. For 10 years he has been in the laboratory of the department of Hygrothermics where he set-up, used and developed several special hygrothermal laboratory measurement equipment such as NMR scanner, water vapor permeability measurements, helium pycnometer, hotplate measurements, etc., as well as working on several hygrothermal field tests. Since then, he started working in the software development group of the department of Hygrothermics, where he performed modeling, programming and testing of the transient hygrothermal transport calculation (www.WUFI.com).

Since 2005, Mr. Kehrer has been the Group Manager and responsible for the development, quality control and sales the WUFI products.
