Budd W. Beatty is a Senior Manager with JELD-WEN, he has been employed with JELD-WEN for 24 years and has been involved in the manufacture, design and application of windows and doors during that time.

Mr. Beatty has been working in The JELD-WEN, Product Integrity Group since 1998. He is responsible for forensic analysis of reported product problems, identification of and evaluation of current and alternative materials, processes, and designs, and he acts as a technical representative to government and private specification groups. He is involved in laboratory and field testing of windows, and doors and the window/door to wall interface relevant to air and water infiltration resistance standards. Mr. Beatty has inspected over 2,000 housing units and consulted on construction defect cases with special emphasis on thermal conductivity, water intrusion and wall system design. He provides oversight of a current fellowship grant program with the USC School of Architecture Masters Programs including the Architectural Schools of: Building Science, Historic Preservation, Architecture, and Landscape Masters Degrees programs. He has training and experience in the use of thermographic imaging as a tool for investigating moisture infiltration and migration related defects in building envelopes. The Product Integrity Group is actively involved in Hygro-Thermal monitoring of 12 sites throughout the US and Canada.
