

21st IEEE/NPSS Symposium on Fusion Engineering
Hilton Hotel, Knoxville, TN Sept. 26-29, 2005

Forum
**Codes & Standards for
ITER Procurements**

Monday, Sept. 26, 7:00-9:00 p.m.

Salon C

The fusion community is now preparing for ITER equipment procurements. What codes and standards will be invoked, given ITER's nuclear and safety considerations and its international character? There seem to be some clear answers but also some uncertainty. With the site decision behind us, one major uncertainty is eliminated and it should now be possible to make more rapid progress.

Goal of the forum: A better understanding of what codes and standards will be used for ITER procurements and recognition of areas in need of further clarification.

Speakers

ITER Perspective, P. Barabaschi

Electrical Systems, C. Neumeyer

Magnets, P. Titus

Mechanical Systems, D. Petti, I. Zatz
