Subject: UMR Career Fair 7-23-2004  
Date: 7-26-2004

The Career Fair at the U. Missouri, hosted by the Nuclear Engineering Department as part of their Summer Camp, drew 59 high school students from all over the U. S. A. It was a useful exercise, in my opinion, in that it introduced these very promising students to ORNL. Most did not know what ORNL was, or where it was located. They were quite impressed with the range of research and development activities. I think that a seed was planted in the minds of many of them and they will be encouraged to pursue academic careers in the nuclear field. I encourage ORNL to do this again next summer.

Brochures from NSTD, SNS, Materials Research, and ORNL and the ORNL Review were distributed. It would have been useful to have a poster board or free-standing display to attract attention.

KAPL, ANL-W, Black and Veach, and two other companies were also represented.

If you like, I will be glad to represent ORNL again next year.
