

SHaRE USER FACILITY
Atom Probe Field Ion Microscopy

USER AGREEMENT TO RESTRICT USE OF SOFTWARE

**Off-site use of the atom probe control program software
by collaborative users of the SHaRE User Facility**

The Office of Chief Counsel of the Oak Ridge Operations of the Department of Energy has stated that the reserved government license for the software program entitled "Atom Probe Control Program (ESCR 28-X, CR-30)" covers the off-site use of the software by collaborative users of the SHaRE User Facility Atom Probe for the sole purpose of analysis and reduction of data generated from the atom probe. Thus, Oak Ridge National Laboratory may permit SHaRE User Facility users to use the software at their own institution in order to analyze data obtained from the atom probe.

Off-site use of the software package "Atom Probe Control Program (ESCR 28-X, CR-30)" is approved only for reduction of data obtained during approved SHaRE User program research projects.

I agree with the above stipulation (signature and printed name of user and institution follows):

SIGNATURE: _____

DATE: _____

NAME: _____

INSTITUTE: _____

A copy of the signed agreement will be retained in the SHaRE User Facility files.
