Magnetism and Transport in Reduced Dimensions
A. P. Baddorf

Oak Ridge National Laboratory has an active interest in the magnetism, structure, and transport properties of transition metal oxides. Capabilities for fabrication and characterization of these materials in reduced dimensions will be presented. New facilities and directions will be discussed.

Oak Ridge National Laboratory, managed by UT-Battelle, LLC, for the U.S. Dept. of Energy under contract DE-AC05-00OR22725.
