

Invited talk, Computational Materials Science Network Workshop,
Vanderbilt University, Nashville, Tenn., January 11, 2003

A Few Questions: An Experimental Address to Theorists

A. P. Baddorf

This talk presents examples of experimental studies of electrical transport in systems of low dimensionality, ranging from quasi-2D down to 1D. It serves as a review of the types of systems that have or will be studied at ORNL. The emphasis is on open questions, which can hopefully be answered by theory.

Research sponsored by the Laboratory Directed Research and Development Program of Oak Ridge National Laboratory, managed by UT-Battelle, LLC for the U. S. Department of Energy under Contract No. DE-AC05-00OR22725.
