

**What Web Authors and Designers Should Know About Search Engines,
Version 2.1 (abridged)**

Gay Marie Logsdon¹

Inland Northwest Chapter Meeting
Society for Technical Communication
Spokane, Washington, August 2, 2000

Abstract

Web site designers can use principles based upon search engine technology to increase the hits their Web sites receive and make their information easier for users to find. This presentation reviews search engine technology and discusses its implications for Web site design from the standpoint of the writer, the editor, and the artist.
