

HTR-10 SCALE-DEM model

Contributors : Rabab Elzohery, Yves Robert, Rike Bostelmann, Germina Ilas

- The model represents the HTR-10 initial critical core adopted from an old SCALE model*.
- The active core contains a mixture of fuel pebbles and graphite pebbles with a ratio of **57:43**.
- Pebbles are placed as **holes**, where the holes coordinates are determined using **DEM**.
