This software has been operating instruments at HFIR for over 15 years and has been adopted by several other neutron scattering facilities around the world.

Scientific Interests

My principal scientific interests concentrate on the use of elastic and inelastic neutron scattering techniques in the study of forefront problems in quantum materials. Topics of interest have included complex magnetism and novel effects in quantum magnets, interplay between magnetism and itinerant electrons, search for fractionalized quasiparticles in quantum spin liquid candidates, and studies of static and dynamic magnetism in iron-based superconductors.
