

Petro Maksymovych

Center for Nanophase
Materials Sciences
Oak Ridge National Laboratory
Oak Ridge, TN, 37831
Phone: (865) 368-0936
E-mail: 5nm@ornl.gov
[Google Scholar](#)

Objective: solve interesting problems through microscopy and computational thinking

Education/Training

2001 Taras Shevchenko University B.S. Chemistry (V. Yatsimirsky)
2007 University of Pittsburgh Ph.D. Chemistry (J. T. Yates, Jr.)

Research Experience

2019-present **Senior Research Scientist**, Center for Nanophase Materials Sciences, Oak Ridge National Laboratory

Leading research on quantitative probes of superconductivity on atomic scale and discovery of "hidden" states in quantum materials

2014 - 2019 **Research Scientist**, Center for Nanophase Materials Sciences, ORNL

Led research on switchable and adaptive van der Waals materials for integration of phase transitions into 2D electronics paradigm

2009-2013 **Research & Development Associate**, Center for Nanophase Materials Sciences, ORNL

Led effort toward synthesis and understanding of structurally and electronically correlated materials, including unconventional superconductors on molecular lattice

2007-2009 **Eugene P Wigner Fellow**, Center for Nanophase Materials Sciences, ORNL

Discovered electron tunneling and electronically conducting topological defects in ferroelectric materials, with potential for energy-efficient neuromorphic computing

Career Highlights

- International expert in scanning probe microscopy and molecular manipulation
- Quantification of nanoscale measurements, using modeling, machine learning and data analytics
- Principal investigator and task lead on large-scale collaborative projects
- Theme Leader for "Active and Adaptive Nano" at Center for Nanophase Materials Sciences
- President of Tennessee chapter for American Vacuum Society
- 2019 ISI Highly Cited Researcher
- 2015 Peter Mark Award from the American Vacuum Society
- Eugene P. Wigner Fellow ORNL (2007-2009)
- 110+ peer-reviewed publications (h-index 45)
- 30+ invited talks
- 6 patents
- 4 book chapters
- Notable scientific results:
 - nanoscale superconductivity
 - nanoscale thermoelectricity
 - nanoscale phase transitions
 - self-organization and topological defects
 - vdW ferroelectrics
 - programmable reactions
 - ferroelectric neuromorphics

Technical Expertise

Signal analytics: general multivariate statistics and machine learning (unsupervised emphasized), image analysis (feature finding, graph representation, integral transforms, compressed sensing, data fusion), hyperspectral data (dimensionality reduction, clustering, component analysis, mixture models), time-series analytics (outlier detection, stochastic processes, quantile regression, Gaussian processes), metric learning, neural networks (autoencoders, Siamese networks, CNN, LSTM), probabilistic programming.

Computational methodologies: Python, Wolfram Language (Mathematica), Labview, Matlab, COMSOL, Kwant (tight-binding modeling), cloud infrastructure

Code development: creator of data-xray - a pythonic cure for the hyperspectral morass, focused on rapid aggregation and reporting of heterogeneous microscopy and spectroscopy datasets <https://github.com/amplifilo/data-xray>

Microscopy and spectroscopy down to atomic-scale: Inventor of non-contact and near-contact Andreev reflection spectroscopies; contact Kelvin Probe Force microscopy and non-contact thermocouple measurement. Proficiency in most major flavors of scanning probe microscopy methods, with emphasis on ultrahigh-vacuum environment: STM (STS, QPI, JSTM, thSTM), AFM, PFM, MFM, ncAFM, cAFM, KPFM, SMIM

Ultrahigh-vacuum methodologies: surface analysis (LEED, TPD), thin film growth, cryogenics, cathodoluminescence

Research Achievement Awards

2020 Best Paper for discovery of tunable quadruple polarization well, CNMS, ORNL

2019 ISI Highly Cited Researcher

2015 Peter Mark Award from the American Vacuum Society

2011 ORNL Director's Award for Outstanding Accomplishment in Science and Technology

2011 ORNL Early Career Award for Individual Scientific Accomplishment

2010 Martin and Beathe Block Prize from the Aspen Center for Physics

2007 Eugene P. Wigner Fellowship, Oak Ridge National Laboratory, Oak Ridge, TN

2007 Wayne B. Nottingham Prize from the Physical Electronics Conference

2006 Morton Traum Award from the American Vacuum Society

Leadership Experience

Task Leader for "Abisko: Deep Codesign of an Energy-Optimized, High Performance Neuromorphic Accelerator", 2021-present: leading research effort in bridging nano- and device scale in neuromorphic computing materials, through the use of switching microscopy and data analytics

Principal Investigator for "Probing Coupled and Competing Polar Orders from Nano to Mesoscales", Field-Work Proposal from Basic Energy Sciences, US DOE, 2021-present: leading research effort in switchable quantum materials, "hidden" states in quantum and

classical phase transitions, and probe microscopy for measurement and manipulation of topological defects

Theme Leader for “Active and Adaptive Nano”, 2018-present: Center for Nanophase Materials Sciences, ORNL

Organizing and coordinating one of four primary research directions at CNMS (network of 10+ scientists), dedicated to understanding of metastable materials and non-equilibrium thermodynamics on the nanoscale. Report to Leadership team, Scientific Advisory Committee and DOE Review Panel.

President of the Tennessee Valley Chapter of the American Vacuum Society, 2016-present:

Organizing, sponsoring and coordinating members of American Vacuum Society in Tennessee, Georgia, Alabama, Kentucky and South Carolina – including local conferences, interaction with local scientific societies, society days, outreach to schools and connections with local industries.

Principal Investigator of Laboratory Directed Research Program “Layered Ferroics by Design”, 2014-2017: pioneered new approaches to tune complex layered materials, enabling desired “post-graphene” properties of ionic conductivity, spontaneous and magnetic polarization, and electron correlations in layered and 2D electronic materials. The work culminated in new topics for MSED funded FWP at ORNL, theory and experimental programs at CNMS, and produced three successful postdoctoral fellows.

Funded initiatives and research proposals

Principal Investigator:

2021-present: *Abisko: Deep Codesign of an Energy-Optimized, High Performance Neuromorphic Accelerator*, DOE/BES/ASCR

2021-present: *Probing Coupled and Competing Polar Orders from Nano to Mesoscales*, FWP DOE/BES/MSED (Scanning Probe and Electron Microscopy)

2015-2017: *Layered Ferroics by Design*, ORNL/LDRD

2011-2013: *Thermopower at the Atomic Scale*, ORNL/SEED

2009: *Molecular Imaging of Photoactive Interfaces using Tuning Fork Atomic Force Microscopy* – DOE instrument grant

Co-Investigator:

2009-present: *Probing Ferroic Transitions from the Atomistic to Mesoscopic Scales*, FWP DOE/BES/MSED (Scanning Probe and Electron Microscopy)

2019-present: *Nanoscale quantum and classical sensing for superconducting and topological quantum information*, FWP DOE/BES/MSED (Scanning Probe and Electron Microscopy)

2019-2021 *Accelerating Discovery, Synthesis, and Control of Topological Quantum Materials*, ORNL/LDRD

2017-2019 *Atomic Force Microscopy Beyond the Standard Quantum Limit*, ORNL/SEED

2008-2010 *Single Molecular Imaging and Spectroscopy of Adsorbed Molecules*, ORNL/LDRD

Conference organization/networking

2022 CNMS User meeting: Nano4Neuro - bringing nanovision into neuromorphic computing

2021 APS Focus session: Topology in soft and condensed matter

2021 Fundamental Physics of Ferroelectrics and Related Materials (Ferro2021)

2020 Fundamental Physics of Ferroelectrics and Related Materials (Ferro2020)

2018 Annual conference of Tennessee Valley Chapter of the American Vacuum Society

2016 Workshop on "Collective phenomena in 2D and layered materials", co-organized with American Vacuum Society, Oak Ridge National Laboratory

2012 Materials Research Society Congress ("Oxide Nanoelectronics and Multifunctional Dielectrics")

2011 International Materials Research Congress, Cancun, Mexico ("Fundamentals and Applications of Complex Oxides for Information and Energy")

2011 MRS proceedings editor for "Oxide nanoelectronics" symposium

Member of American Physical Society, American Vacuum Society, Materials Research Society, American Ceramic Society

Service and Committee Membership

2019-2021 CNMS User Executive Committee

2015, 2019 - NSF review panels

2010-2012 SEED proposal committee at ORNL

Regular judge of student competitions (AVS Morton Traum Award, MRS Graduate Student Awards)

5. *Single Contact Tunneling Thermometry*, P. Maksymovych, US Patent: 9,267,851, (2016)
6. *Real space mapping of oxygen vacancy diffusion and electrochemical transformations by hysteretic current reversal curve measurements*, S. V. Kalinin, N. Balke, Albina Y. Borisevich, Stephen Jesse, P. Maksymovych, Y. Kim, E. Strelcov, US Patent: 8,752,211 (2014)

Refereeing activities

- Referee in Nature (Nanotechnology, Communications, Scientific Reports, Computational Materials, Quantum Materials), Science, Journal of the American Chemical Society, Physical Review Letters, Physical Review B, Advanced Functional Materials, Surface

Science, ACS Nano, ACS Applied Materials and Interfaces, Nanotechnology, Physical Chemistry Chemical Physics, Physica Status Solidi, Journal of Physics D, Chemical Reviews, Langmuir

- Referee of research grant proposals from DOE Office of Science, DOE and NSF Early Career Programs, DOE SBIR initiatives

Postdoctoral Scholars Advised:

1. Geoffrey Rojas, Ph. D. U Nebraska → Research Scientist at University of Minnesota
2. Simon Kelly, Ph. D. Leiden University → Staff Scientist at Lord Corporation
3. Seokmin Jeon, Ph. D. CalTech → Research Analyst at Institute for Defense Analyses
4. Marius Chyasnovich, Ph. D. Clemson University → Research Scientist at Dow Chemical
5. Jun Wang, Ph. D. University of New Hampshire → Research Scientist at Cargill
6. (co-Advisor) Sabine Neumayer, Ph. D. University College, Dublin
 - 2018 Vacuum Society Poster Award
 - 2018 Material Research Society Spring Meeting NM11 Best Presentation Award Gold
 - 2020 Outstanding Presentation Award, Fundamental Physics of Ferroelectrics and Related Materials Workshop
7. Sang Yong Song (present), Ph. D. Daegu Gyeongbuk Institute of Science and Technology, South Korea
8. Olha Popova (present), Ph. D. University of Basel, Switzerland.

Students co-Advised:

Nickolay Borodinov (Clemson University) → data scientist at Siemens
 Stuart Burns (UNSW, Australia) → postdoctoral researcher at U. of Calgary, Canada

Collaborators: Jose Lado, Aalto Univ., Finland, M. Marinella, Arizona State Univ., Max Lavrentovich, University of Tennessee, Knoxville, D. C. Sorescu, National Energy Technology Laboratory; J. I. "Nonlocal Dissociative Chemistry of Adsorbed Molecules Induced by Localized Electron Injection into Metal Surfaces."
Physical Review Letters, 2007, 99, 016101
105. Dougherty, D. B.; [Maksymovych, P.](#); Lee, J.; Feng, M.; Petek, H.; Yates, J. T., Jr. "Tunneling Spectroscopy of Stark-Shifted Image Potential States on Cu and Au Surfaces." Physical Review B, 2007, 76, 125428
106. Suzuki, T.; [Maksymovych, P.](#); Levy, J.; Yates, J. T.
"Formation of Carbon-Induced Dimer Vacancy Defects on Si(001)-2 X 1 by Thermal Decomposition of Organic Molecules-Lack of Dependence on the Molecules' Structure."
Surface Science, 2006, 600, 366.
107. [Maksymovych, P.](#); Yates, J. T.
"Unexpected Spontaneous Formation of CO Clusters on the Au(111) Surface."
Chemical Physics Letters, 2006, 421, 473.
108. [Maksymovych, P.](#); Yates, J. T., Jr.
"Propagation of Conformation in the Surface-Aligned Dissociation of Single Ch₃SSCH₃

- Molecules on Au(111).*"
Journal of the American Chemical Society, 2006, 128, 10642.
109. Maksymovych, P.; Sorescu, D. C.; Yates, J. T., Jr.
"Gold-Adatom-Mediated Bonding in Self-Assembled Short-Chain Alkanethiolate Species on the Au(111) Surface."
Physical Review Letters, 2006, 97, 146103.
110. Maksymovych, P.; Sorescu, D. C.; Yates, J. T., Jr.
"Methanethiolate Adsorption Site on Au(111): A Combined Stm/Dft Study at the Single-Molecule Level."
Journal of Physical Chemistry B, 2006, 110, 21161.
111. Dougherty, D. B.; Maksymovych, P.; Yates, J. T., Jr.
"Direct STM Evidence for Cu-Benzoate Surface Complexes on Cu(110)."
Surface Science, 2006, 600, 4484.
112. Dougherty, D. B.; Maksymovych, P.; Lee, J.; Yates, J. T., Jr.
"Stark-Shifted Image Potential States of Benzene Bilayers on Cu(110) and Cu(111)." Chemical Physics Letters, 2006, 431, 303.
113. Dougherty, D. B.; Maksymovych, P.; Lee, J.; Yates, J. T., Jr.
"Local Spectroscopy of Image-Potential-Derived States: From Single Molecules to Monolayers of Benzene on Cu(111)."
Physical Review Letters, 2006, 97, 236806.
114. Rzeznicka, I.; Lee, J. S.; Maksymovych, P.; Yates, J. T., Jr.
"Nondissociative Chemisorption of Short Chain Alkanethiols on Au(111)."
Journal of Physical Chemistry B, 2005, 109, 15992.
115. Maksymovych, P.; Sorescu, D. C.; Dougherty, D.; Yates, J. T., Jr.
"Surface Bonding and Dynamical Behavior of the CH₃SH Molecule on Au(111)."
Journal of Physical Chemistry B, 2005, 109, 22463.
116. Maksymovych, P.; Gasmire, T.; Ohno, S.; Yates, J. T.
"Improved Crystal Grinding and Polishing Holder for Metal Single Crystal Preparations." Journal of Vacuum Science & Technology A, 2005, 23, 362.
117. Thompson, L.; Lee, J. G.; Maksymovych, P.; Ahner, J.; Yates, J. T., Jr.
"Construction and Performance of an Ultrahigh Vacuum-Compatible High Temperature Vapor Dosing System for Low Vapor Pressure Compounds."
Journal of Vacuum Science & Technology A, 2003, 21, 491.
118. Mezhenny, S.; Maksymovych, P.; Thompson, T. L.; Diwald, O.; Stahl, D.; Walck, S. D.; Yates, J. T., Jr.
"STM Studies of Defect Production on the TiO₂(110)-(1 X 1) and TiO₂(110)-(1 X 2) Surfaces Induced by UV Irradiation."
Chemical Physics Letters, 2003, 369, 152.
119. Maksymovych, P.; Mezhenny, S.; Yates, J. T.
"STM Study of Water Adsorption on the TiO₂(110)-(1 X 2) Surface."
Chemical Physics Letters, 2003, 382, 270.

120. Mezhenny, S.; Sorescu, D. C.; Maksymovych, P.; Yates, J. T., Jr.
"Dissociation of CH_3I on the Al(111) Surface - an Stm and Density Functional Theory Study."
Journal of the American Chemical Society, 2002, 124, 14202.
121. Lee, J. G.; Ahner, J.; Maksymovych, P.; Yates, J. T.
"Molecular Triangulation - Finding the Conformation of Adsorbed Self-Assembled Organic Monolayers."
Chemical Physics Letters, 2001, 340, 21.

List of Invited talks:

1. *The Multiwells: Switching Portraits of the Thiophosphate Family*, International Symposium on Ferroic Domains & Micro- to Nanoscopic Structures, Kofu, Japan, August 2022.
2. *Navigating disorder spaces of superconductors using atomic-scale imaging*
Electronics Materials and Applications 2021, American Ceramic Society.
3. *Navigating atomic scale disorder with correlative tunneling microscopy and machine learning*, APS March Meeting 2021.
4. *Ferroics Meet Ionics in the land of van der Waals*, VIRTUAL 21st IEEE International Conference on Nanotechnology, Montreal CA
5. *Using forces and data to understand disorder in unconventional superconductors*, Electronic Materials and Applications 2020, Orlando, Florida.
6. *Nanoscale Ferroelectricity Beyond Size Effects*, Taiwan Semiconductor Manufacturing Company, April 2018
7. *Stitching Complex Materials with Metal Thiophosphates*, Annual meeting of the Appalachian Regional Microscopy Society, Boone, NC, Oct. 2018
8. *Reanimating Atoms, Molecules and a few things in between*, Washington University in St. Louis, September 2018.
9. *Charting the future for Tennessee Valley AVS Chapter*, AVS Board of Director's Meeting, Raleigh, NC, January 2018
10. *Sorting through the nanoscale with more dimensions, better observables and smarter sampling*, Center for Nanophase Materials Sciences Seminar, January 2018
11. *Ferroelectric domain walls: from conductors to insulators and back again*, Deutsche Physikalische Gesellschaft spring meeting 2017, Dresden, Germany
12. *Toward programmable matter at the nanoscale*, 63rd Symposium of the American Vacuum Society, Nashville, TN, October, 2016. Symposium in honor of Prof. John T. Yates, Jr.
13. *Nanoscale control of phase transitions as a pathway to precise material manipulation*, Electronic States and Phases Induced by Electric or Optical Impacts, IMPACT 2016, Cargese, France, August-September, 2016.
14. *Taking control of the nanoscale with scanning programming microscopy*, Peter Mark Memorial Award Lecture, 62nd Symposium of the American Vacuum Society, San Jose, CA, October, 2015.
15. *Electrostatic Control of Low Dimensional Molecular Ionic Assemblies*, 11th International Symposium on Crystalline Organic Metals, Superconductors and Magnets, Bad Goetting, Germany, September, 2015.

16. *Local Manipulation of Electronic Transport and Atomic Structure in Ferroelectric and Complex Oxides*, 42nd Conference on the Physics and Chemistry of Surfaces and Interfaces (PSCI-42), Snow Bird, Utah, January 2015.
17. *Taking control of the nanoscale with scanning programming microscopy*, Drexel University, February 2015.
18. *Epitaxial growth of ionic molecules: our quest for electron spectroscopy of superatoms*, Gordon Research Conference on Conductivity & Magnetism in Molecular Materials, Lewiston, ME, August 2014.
19. *Novel properties of topological defects in proper and improper ferroelectrics*, CIMTEC 2014, Montecatini-Terre, Italy, June, 2014.
20. *To Switch or not to Switch: A Probe Microscopy Perspective*, Materials Science & Technology Conference, MS&T 2013, Montreal, Canada, October 2013
21. *A Transport perspective on Local Manipulation of Ferroelectric and Complex Oxide Surfaces*, American Physical Society March Meeting, 2013, Baltimore, MD
22. *A Transport perspective on Local Manipulation of Ferroelectric and Complex Oxide Surfaces*, XXI International Materials Research Congress (IMRC) 2012, Cancun, Mexico, August 2012
23. *Nanoscale Transport through Ferroelectric and Metal Surfaces*, Nanoscience colloquium at Vanderbilt University, Nashville, TN
24. *Topological Size-effects in Polarization-controlled Transport through Ferroelectric Surfaces*, 2011 Spring Meeting of the Materials Research Society, San Francisco, CA
25. *Local Polarization-dependent Electron Transport Through Ferroelectric and Multiferroic Surfaces*, 2010 Spring Meeting of the Materials Research Society, San Francisco, CA
26. *Local Ferroelectric Switching and Size-effect of BiFeO₃ Films in Ultra-High Vacuum Down to 4 Unit Cells*, 2010 Spring Meeting of the Materials Research Society, San Francisco, CA
27. *Polarization-dependent Electron Tunneling into Ferroelectric Surfaces*, 2009 International Symposium on Integrated Ferroelectrics, Colorado Springs, CO
28. *Polarization-dependent Electron Transport Through Ferroelectric and Multiferroic Surfaces*, 2009 physical sciences colloquium at the North Carolina State University, Raleigh, NC
29. *Intrinsic Polarization Dynamics and Disorder Effects by Ultra-High Vacuum Piezoresponse Force Microscopy*, 2009 Spring Meeting of the Materials Research Society, San Francisco, CA
30. *Imaging Hot-electron Transport using Scanning Tunneling Microscopy*, physical sciences colloquium at the University of Tennessee, Knoxville, 2008.
31. *Imaging Hot-electron Transport using Chemical Reactions in Scanning Tunneling Microscopy*, American Physical Society March Meeting, New Orleans 2008.
32. *The Role of Au(111) Herringbone Reconstruction as a Stress-landscape and Source of Adatoms*, Center for Individual Nanoparticle Functionality, Technical University of Denmark, Lyngby, Denmark, 2006.
33. *Adatom-mediated Chemistry in Self-assembled Monolayers of Alkanethiols on Au(111)*, University of Toronto, Canada 2006.
