

DAVID L. MCCOLLUM

Senior R&D Staff ♦ Oak Ridge National Laboratory

2360 Cherahala Boulevard, Knoxville, Tennessee 37932 (USA) ♦ mccollumdl@ornl.gov

www.ornl.gov/staff-profile/david-l-mccollum ♦ scholar.google.com/citations?user=LjmiTtQAAAAJ&hl=en

PROFESSIONAL EXPERIENCE

Senior R&D Staff, *Oak Ridge National Laboratory*, Knoxville, Tennessee, USA, 9/2021-Present

Guest Senior Research Scholar, *International Inst. for Applied Systems Analysis*, Laxenburg, Austria, 10/2021-Present

Honorary Senior Research Fellow, *IPCC WGIII Technical Support Unit, Imperial College London*, UK, 7/2020-Present

Research Fellow in Energy and Environment, *Baker Center for Public Policy, U. of Tennessee*, USA, 1/2016-Present

Principal Technical Leader, *Electric Power Research Institute*, Palo Alto, California, USA, 2/2019-9/2021

Senior Research Scholar, *International Institute for Applied Systems Analysis*, Laxenburg, Austria, 2/2011-1/2019

Graduate Researcher, *University of California, Davis, Institute of Transportation Studies*, USA, 9/2005-3/2011

Research Aide, *Argonne National Laboratory*, Washington, DC, USA, 9-12/2007

Assistant Language Teacher, *Japan Exchange and Teaching Program*, Sendai, Japan, 7/2004-7/2005

Research Intern, *National Renewable Energy Laboratory*, Golden, CO, USA, 6-8/2003

Legislative Intern, *United States Senate Committee on Governmental Affairs*, Washington, DC, USA, 5-8/2001

EDUCATION

University of California, Davis, Davis, CA, USA

Ph.D., Transportation Technology & Policy (2011);

M.S., Agricultural & Resource Economics (2008); M.S., Transportation Technology & Policy (2007)

The University of Tennessee (UT), Knoxville, TN, USA

B.S., Chemical Engineering, Chemistry minor (2004), *summa cum laude and University Honors Scholar*

Ajou University, Suwon, South Korea (study abroad, 2002)

EXPERTISE & INTERESTS

Integrated assessment and multi-sector dynamics of global change and its human drivers and impacts

Analysis of energy, climate, and other sustainability policies, including assessing the inter-linkages between them

Energy-economic systems modeling and scenario analysis to inform policy-making and corporate decision-making
(at the state, national, and international levels)

Transportation sector modeling and analysis (technology, policy, consumer behavior)

Electricity sector modeling and analysis (end-use electrification, systems modeling, and markets and regulation)

Sustainable finance (investment needs for achieving energy, climate, and other sustainability goals)

PEER-REVIEWED PUBLICATIONS (SELECTED)

Zakeri, B., K. Paulavets, L. Barreto-Gomez, L. Gomez Echeverri, S. Pachauri, B. Boza-Kiss, C. Zimm, J. Rogelj, F.

MAJOR RESEARCH ACTIVITIES & PRINCIPAL INVESTIGATOR ROLES (SELECTED)

- Net Zero World Initiative**, 2021-Present. ORNL Lab Lead, and Deputy Manager for Partnerships within the cross-lab NZW Action Center. NZW is a partnership between U.S. federal agencies, U.S. national laboratories, foreign governments, and philanthropies to support countries’ rapid achievement of energy systems decarbonization.
- DECARB (Decarbonizing Energy through Collaborative Analysis of Routes and Benefit)**, 2022-Present. Core Analysis Team Member and Inventory Task Lead; DECARB is a multi-lab effort from the DOE-EERE Strategic Analysis Team to identify priority areas for decarbonization research within the U.S. government and lab system.
- Intergovernmental Panel on Climate Change**
Sixth Assessment Report (2022): Lead and Contributing Author and WG III Technical Support Unit; Multiple topics
Special Report on 1.5 °C (2018): Contributing Author; Energy investment needs for deep decarbonization pathways
Fifth Assessment Report (2014): Lead Author; Co-benefits and risks of climate change mitigation
- E3SM-GCAM Exploration of CDR**, 2022-Present. Exploring the effectiveness of land-based carbon dioxide removal in stringent mitigation pathways using world-leading earth systems and integrated assessment models
- DecisionScience@ORNL**, 2021-Present. Leading an internal effort to build a diverse analysis community within ORNL.
- Green Climate Fund**, 2019-2021. “Scaling up climate finance in the context of Covid-19: A science-based call for financial decision-makers”
- IIASA-ISC**, 2020-21. “Transformations within reach: Pathways to a sustainable and resilient world – Rethinking energy solutions”, International Institute for Applied Systems Analysis, Austria, and International Science Council, Paris
- U.S. Power Sector Transformation and Air Quality Study**, 2020-21, Energy-economic modeling for six U.S. electric utilities to explore the co-benefits of decarbonization and electrification in their service territories
- U.S. and Canadian Net-Zero Emissions Studies**, 2019-21, Modeling of economy-wide decarbonization pathways to reach net-zero emissions by 2050; stakeholder engagement with U.S. and Canadian utilities to inform decision making
- COMMIT Project**, 2018-20, Enhancing the energy transitions and climate policy modeling capacity of G20 developing countries in support of their enhanced NDC submissions and long-term strategies (European Commission DG-CLIMA)
- CD-LINKS Project**, 2016-19, Exploring technology and policy pathways toward well below 2 °C, with a focus on energy infrastructure investment needs globally and for major economies (European Commission Horizon 2020)
- United Nations Environment Programme Finance Initiative (UNEP-FI)**, 2017-18, Worked with leading international banks to promote use of energy and emissions scenarios for informing risk valuation (motivated by TCFD)
- U.S. Environmental Protection Agency, Office of Transportation and Air Quality Project**, 2016-18, Designed and carried out modeling analyses of the energy-emissions leakage effects of US biofuels policies, with RTI International
- International Council for Science (ICSU/ISC)**, 2016-17, Led a team of energy experts to draft a chapter on energy-related Sustainable Development Goal interactions, and coordinated the overall report as member of the editorial team
- Asian Development Bank (ADB)**, 2015, Co-led energy transitions analysis for the ‘Roadmap for Carbon Capture and Storage Demonstration and Deployment in the People’s Republic of China’
- United Nations Environment Programme (UNEP), The Emissions Gap Report 2014**, Lead Author of ‘Chapter 2: What emission levels will comply with temperature limits?’
- Global Energy Assessment**, 2009-12, Lead Author of ‘Chapter 17: Energy Pathways for Sustainable Development’
- Multi-Path Transportation Futures Study**, 2007, Argonne National Laboratory, Characterized transport fuel production options by costs, emissions and water use
- Models for Carbon Dioxide Transport and Underground Storage**, 2005-06, University of California, Davis, Investigated techno-economic models for CO₂ compression, pipeline transport, and geological storage

LEADERSHIP POSITIONS, ADVISORY BOARDS & COMMITTEES (SELECTED)

Review Editor, Fifth National Climate Assessment (NCA5), Chapter on *Sector Interactions, Multiple Stressors, and Complex Systems*

Co-Chair, Working Group on *Connecting MSD Research to Operations*, MultiSector Dynamics Community of Practice

Member, Expert Group on Energy’s Interlinkages with Other SDGs in the framework of the SDG7 Technical Advisory Group (SDG7 TAG), United Nations Department of Economic and Social Affairs (UN DESA)

Associate Editor, *Renewable and Sustainable Energy Transition* (a peer-reviewed, open-access journal published by Elsevier)

Member, National Academies of Sciences, Engineering and Medicine; Board on International Scientific Organizations

Advisory Team, Open Energy Outlook for the United States

Steering Committee, National Renewable Energy Laboratory, Transportation Energy and Mobility Pathway Options model

Scientific Advisory Committee Member, Science Based Targets Initiative

Steering Committee Member, International Transport Energy Modeling Consortium (iTEM)

Advisory Board Member, International Transport Forum (of the OECD), Decarbonising Transport Initiative

Reviewer for *Science, Nature, Nature Climate Change, Nature Energy, Nature Sustainability, Nature Communications, Environmental Research Letters, Climatic Change, Joule, Energy and Climate Change, Energy Economics*, and others
