

JAMES F. BROWNING, PhD

165 WHIPPOORWILL DR OAK
RIDGE, TN 37830
(865) 209-5273
browningjf@ornl.gov

PERSONAL PROFILE

- 25 years of experience leading and mentoring multi-disciplinary research teams and projects.
- Expert in reflectometry applied to physics, chemistry, and biology studies.
- Experienced scientist with extensive experience developing experimental capabilities.

POSITIONS

Oak Ridge National Laboratory – Oak Ridge, TN

Group Leader, Reflectometry, 2021 - present

Team Lead, Reflectometry, 2019 - 2021

Senior Research Staff, 2007 - 2023

Distinguished Research Staff, 2023 - present

- Group leader for neutron reflectometry responsible for line management of staff, post-docs and students assigned to the reflectometry suite within the Neutron Scattering Division.
- Responsible for growing and expanding scientific collaborations across the instrument suite and pursuing potential funding opportunities supporting those efforts.
- Responsible for developing a team dynamic among all staff involved with the reflectometry instruments across multiple groups, including performance management and conflict resolution.
- Mentor junior staff and support the career development of reflectometry team members.
- Neutron Scattering Scientist responsible for developing collaborative research programs that exploit the capabilities of the Liquids Reflectometer (LR) and to support and enable user-based research on the LR.
- Responsible for the development, implementation and maintenance of sample environments used on the LR.
 - Led junior staff and post-docs in the development of an electrochemical cell that is now one the most requested sample environments from our users. The cell, which was designed as an electrochemical cell, is frequently used for the study of liquid-solid interfaces, and can be used in experiments with fluid exchange.
 - Led the development and implementation of two multi-environment vacuum chambers 1) ultra-high vacuum with sample heating to 600 °C and precision gas aliquoting capability and 2) to accommodate both

temperature and electric field. These chambers are now part of the user program at LR.

- Led the development of a new high-temperature cell for corrosion studies of molten salt / alloy interfaces.

Sandia National Laboratories, Albuquerque, NM

Distinguished Member of Technical Staff, 2004 – 2007

- Responsible for a multi-disciplinary research program with the goal of elucidating the structure–property relationships of metal tritide thin films of importance to neutron generator technology. This program involved researchers with various backgrounds and skill sets including neutron and ion scattering techniques, transmission electron microscopy, x-ray diffraction, surface science and nanoindentation. These collaborative efforts extended across both organizational lines within Sandia and to Los Alamos and involved the Materials Science department at New Mexico Tech. My responsibilities included the development and nurturing of a cohesive inter-group research program, thus encompassing coordination of efforts, compilation of results as they were obtained and dissemination of results among team members and lab management. Administrative responsibilities included oversight of these research activities and their supporting budgets, which were on the order of \$4M per year.

Principal Member of Technical Staff, 1997 - 2004

- Established materials research programs in areas of interest to the neutron generator community at Sandia and Los Alamos National Laboratories. This included the development of a time-of-flight / energy spectroscopy technique for determining ion species, charge state and energies of ions emanating from arc discharge plasmas. Of particular importance was the development, in partnership with others, of a high-energy ion beam analysis technique for the quantitative determination of metal hydride chemistries of metal hydride thin films containing each of the hydrogen isotopes. The technique was also capable of measuring other elements such as oxygen, thereby enabling the study of oxide growth and its effect on hydride formation. This work ultimately led to the design and implementation of two dedicated beamlines at Sandia's Ion Beam Laboratory for materials research related to neutron tube design and development.
- Responsible for the technical oversight and direction of the Gas Dynamics and Mass Spectrometry (GDMS) laboratory, which included supervision of two staff members and a laboratory technician.

Senior Member of Technical Staff, 1994 - 1997

- Responsible for the development and implementation of a mass spectrometric capability for the performance of hydrogen isotope analysis of War Reserve (WR) neutron tube components following the DOE's Quality Criteria 1 (QC-1).

General Electric Neutron Devices, Department of Energy Pinellas Facility, Largo, FL

Senior Physicist, 1991 – 1994

- Responsible for the oversight and operation of the Ion Accelerator Lab in support of the High Energy Density Physics group at Sandia National Laboratories. The primary focus of this work was the development of activation foils used as diagnostics in D-T fusion experiment on the Particle Beam Fusion Accelerator (the predecessor to the Z-machine at Sandia).
- Oversight of the Radio- and Nuclear Chemistry laboratory, including the supervision of four technicians.

PROFESSIONAL ACTIVITIES

- Topical Editor for the Conference on the Application of Accelerators in Research and Industry.
- Serve as reviewer for Elsevier and ACS Journals
- Materials Research Society Publications Committee, 2017 – 2019.
- Sample Environment Steering Committee (Chair), Neutron Science Directorate, 2015 - 2019
- Served as a reviewer for the USDoS/USAID LAUNCH Program, 2013
- Neutron Sciences Directorate LRD review committee, 2008 – 2010
- Adjunct Professor, Department of Materials and Metallurgical Engineering, New Mexico Institute of Mining and Technology, Socorro, NM, 2006 – 2009.
- Founder and chair for the international conference on Hydrogen and Helium Isotopes in Materials, 2004 - 2009
- Executive Committee Los Alamos Neutron Science Center User Group, 2004 - 2006

AWARDS

- Oak Ridge National Laboratory Significant Event Award (2013)
- DOE Defense Program's Award of Excellence for "Leading Investigations of the Basic Questions and Fundamental Behaviors in Stockpile Systems" (2007)
- Sandia National Laboratories Employee Recognition Award for Exceptional Achievements (2003)
- DOE Defense Program's Award of Excellence for "Significant Contributions to the Stockpile Stewardship Program" (2001)
- Sandia National Laboratories Employee Recognition Award for Exceptional Achievements (2001)
- Sandia National Laboratories Employee Recognition Award for Exceptional Achievements (1999)

PROFESSIONAL SOCIETIES

- Materials Research Society
- Neutron Scattering Society of America

EDUCATION

- Doctor of Philosophy, Materials Science and Engineering, New Mexico Institute of Mining and Technology
Dissertation title: "Structural Evolution of β -Phase Erbium Tritide"
- Master of Science, Physics, University of Georgia Thesis title: "Orientation Effects in Proton-H₂ Collisions"
- Bachelor of Science, Physics, Augusta College

PATENTS

- "A System for Studying a Sample of Material Using a Heavy Ion Induced Mass Spectrometer Source", D.P. Fries, J.F. Browning, US Patent No. 5,784,424, 1999.
- "A Method for Studying a Sample of Material Using a Heavy Ion Induced Mass Spectrometer Source", D.P. Fries, J.F. Browning, US Patent No. 5,872,824, 1999.
