

DAVID L. MCCOLLUM

Distinguished R&D Staff ♦ Oak Ridge National Laboratory

2360 Cherahala Boulevard, Knoxville, Tennessee 37932 (USA) ♦ mccollumdl@ornl.gov

www.ornl.gov/staff-profile/david-l-mccollum ♦ scholar.google.com/citations?user=LjmiTtQAAAAAJ&hl=en

PROFESSIONAL EXPERIENCE

Distinguished R&D Staff, *Oak Ridge National Laboratory*, Knoxville, Tennessee, USA, 4/2024-Present
Joint Faculty Professor, *Baker School of Public Policy, University of Tennessee*, USA, 3/2024-Present
Senior R&D Staff, *Oak Ridge National Laboratory*, Knoxville, Tennessee, USA, 9/2021-3/2024
Guest Senior Research Scholar, *International Inst. for Applied Systems Analysis*, Laxenburg, Austria, 10/2021-Present
Research Fellow in Energy and Environment, *Baker School of Public Policy, U. of Tennessee*, USA, 1/2016-Present
Senior Scientist, *IPCC WGIII Technical Support Unit, Imperial College London*, UK, 7/2020-7/2023
Principal Technical Leader, *Electric Power Research Institute*, Palo Alto, California, USA, 2/2019-9/2021
Senior Research Scholar, *International Institute for Applied Systems Analysis*, Laxenburg, Austria, 2/2011-1/2019
Graduate Researcher, *University of California, Davis, Institute of Transportation Studies*, USA, 9/2005-3/2011
Research Aide, *Argonne National Laboratory*, Washington, DC, USA, 9-12/2007
Assistant Language Teacher, *Japan Exchange and Teaching Program*, Sendai, Japan, 7/2004-7/2005
Research Intern, *National Renewable Energy Laboratory*, Golden, CO, USA, 6-8/2003
Legislative Intern, *United States Senate Committee on Governmental Affairs*, Washington, DC, USA, 5-8/2001

EDUCATION

University of California, Davis, Davis, CA, USA
Ph.D., Transportation Technology & Policy (2011);
M.S., Agricultural & Resource Economics (2008); M.S., Transportation Technology & Policy (2007)
The University of Tennessee (UT), Knoxville, TN, USA
B.S., Chemical Engineering, Chemistry minor (2004), *summa cum laude and University Honors Scholar*
Ajou University, Suwon, South Korea (study abroad, 2002)

EXPERTISE & INTERESTS

Integrated assessment and multi-sector dynamics of global change and its human drivers and impacts
Analysis of energy, climate, and broader sustainability objectives, including assessing their inter-linkages
Energy-economic systems modeling and scenario analysis to inform policy-making and corporate decision-making (global, national, and subnational)
Transportation sector modeling and analysis (technology, policy, consumer behavior)
Electricity sector modeling and analysis (end-use electrification, systems modeling, and markets and regulation)
Sustainability finance (investment needs for achieving energy, climate, and other sustainability goals)

PEER-REVIEWED PUBLICATIONS (SELECTED)

Mach, K.J., K. Jagannathan, L., Shi, L.L. Turek-Hankins, J.R. Arnold, C. Brelsford, A.N. Flores, J. Gao, C.E. Martin, **D.L. McCollum**, R. Moss, J. Niemann, B. Rashleigh, and P.M. Reed (2024). “Research to confront climate change complexity: Intersectionality, integration, and innovative governance,” *Earth’s Future*, 12.

MAJOR RESEARCH ACTIVITIES & PRINCIPAL INVESTIGATOR ROLES (SELECTED)

- NetZero-ARMADA: Scalable Multi-Sector Analysis Platform for the Energy Transition**, 2024-Present. Lead PI for an internal \$1.1M LDRD effort to build a powerful modeling and analysis platform operating at decision-relevant scales and taking a 360°, socially-equitable, and nature-inclusive view of net-zero technology deployment
- DecisionScience@ORNL**, 2021-Present. Leading an internal effort to build a diverse analysis community within ORNL; managing an internal LDRD/PD budget of >\$500k to seed new ideas and establish world-leading capabilities
- E3SM-GCAM Exploration of CDR**, 2022-23. Exploring the effectiveness of land-based carbon dioxide removal in stringent mitigation pathways using world-leading earth systems and integrated assessment models
- Net Zero World Initiative**, 2021-Present. ORNL Lab Lead and Co-Manager for Partnerships within the cross-lab NZW Action Center. NZW is a partnership between U.S. federal agencies, U.S. national laboratories, foreign governments, and philanthropies to support countries’ rapid achievement of energy systems decarbonization.
- DECARB (Decarbonizing Energy through Collaborative Analysis of Routes and Benefit)**, 2022-Present. ORNL Lab Lead and Core Analysis Team Member; DECARB is a multi-lab effort sponsored by the DOE-EERE Strategic Analysis Team to develop advanced capabilities and workflows for multi-sectoral decarbonization pathways modeling.
- Energy Modeling Forum 37 Exercise (EMF-37): Deep Decarbonization & High Electrification Scenarios for North America**, 2021-Present. Study Team contributions: (1) Transportation, (2) Ancillary Impacts, (3) Hydrogen
- EDITS Consortium (Energy Demand changes Induced by Technological and Social innovations)**, 2019-Present. Led by IIASA and RITE. Study Team contributions: (1) Energy Security, (2) End-Use Energy Demand Data.
- Intergovernmental Panel on Climate Change**
Sixth Assessment Report (2022): Lead and Contributing Author and WG III Technical Support Unit; Multiple topics
Special Report on 1.5 °C (2018): Contributing Author; Energy investment needs for deep decarbonization pathways
Fifth Assessment Report (2014): Lead Author and Contributing Author; Co-benefits and risks of climate mitigation
- Green Climate Fund**, 2019-2021. “Scaling up climate finance in the context of Covid-19: A science-based call for financial decision-makers”
- IIASA-ISC**, 2020-21. “Transformations within reach: Pathways to a sustainable and resilient world – Rethinking energy solutions”, International Institute for Applied Systems Analysis, Austria, and International Science Council, Paris
- U.S. Power Sector Transformation and Air Quality Study**, 2020-21, Energy-economic modeling for six U.S. electric utilities to explore the co-benefits of decarbonization and electrification in their service territories
- U.S. and Canadian Net-Zero Emissions Studies**, 2019-21, Modeling of economy-wide decarbonization pathways to reach net-zero emissions by 2050; stakeholder engagement with U.S. and Canadian utilities to inform decision making
- COMMIT Project**, 2018-20, Enhancing the energy transitions and climate policy modeling capacity of G20 developing countries in support of their enhanced NDC submissions and long-term strategies (European Commission DG-CLIMA)
- CD-LINKS Project**, 2016-19, Exploring technology and policy pathways toward well below 2 °C, with a focus on energy infrastructure investment needs globally and for major economies (European Commission Horizon 2020)
- United Nations Environment Programme Finance Initiative (UNEP-FI)**, 2017-18, Worked with leading international banks to promote use of energy and emissions scenarios for informing risk valuation (motivated by TCFD)

U.S. Environmental Protection Agency, Office of Transportation and Air Quality Project, 2016-18, Designed and carried out modeling analyses of the energy-emissions leakage effects of US biofuels policies, with RTI International

International Council for Science (ICSU/ISC), 2016-17, Coordinated a team of experts to draft a chapter on energy-related Sustainable Development Goal interactions, and served on editorial team for entire report

Asian Development Bank (ADB), 2015, Co-led energy transitions analysis for the ‘Roadmap for Carbon Capture and Storage Demonstration and Deployment in the People’s Republic of China’

United Nations Environment Programme (UNEP), The Emissions Gap Report 2014, Lead Author of ‘Chapter 2: What emission levels will comply with temperature limits?’

Global Energy Assessment, 2009-12, Lead Author of ‘Chapter 17: Energy Pathways for Sustainable Development’

Multi-Path Transportation Futures Study, 2007, Argonne National Laboratory, Characterized transport fuel production options by costs, emissions and water use

Models for Carbon Dioxide Transport and Underground Storage, 2005-06, University of California, Davis, Investigated techno-economic models for CO₂ compression, pipeline transport, and geological storage

LEADERSHIP POSITIONS, ADVISORY BOARDS & COMMITTEES (SELECTED)

Review Editor, United Nations Environment Programme (UNEP), Global Environment Outlook #7 (GEO-7), Chapter on *Staying on the path we are on – global implications*

Review Editor, Second Austrian Climate Assessment Report (AAR2), Ch. 3: *Settlements, Mobility and Spatial Planning*

Review Editor, U.S. 5th National Climate Assessment, Ch. 18: *Sector Interactions, Multiple Stressors, and Complex Systems*

Co-Chair, Working Group on *Connecting MSD Research to Operations*, Multi Sector Dynamics Community of Practice

Leadership Team, ORNL Climate Change Science Institute (CCSI)

Member, Expert Group on Energy’s Interlinkages with Other SDGs in the framework of the SDG7 Technical Advisory Group (SDG7 TAG), United Nations Department of Economic and Social Affairs (UN DESA)

Associate Editor, *Renewable and Sustainable Energy Transition* (Elsevier)

Member, U.S. Committee for IIASA; National Academies of Sciences, Engineering and Medicine (NASEM); Board on International Scientific Organizations (BISO)

Member, Planning Committee for the *U.S. Research Data Summit 2023*; National Academies of Sciences, Engineering, and Medicine (NASEM), Policy and Global Affairs Division

External Advisory Council, *EmPOWERment* National Science Foundation (NSF) Research Traineeship Program, The Ohio State University

Scientific Advisory Board, EU Horizon 2020 Project *LOCOMOTION*

Scientific Advisory Board, EU Horizon Europe Project *DIAMOND*

Advisory Team, TEMOA modeling for the project *Open Energy Outlook for the United States*

Steering Committee, National Renewable Energy Laboratory, TEMPO transportation pathways model

Scientific Advisory Group, Science Based Targets Initiative

Steering Committee Member, International Transport Energy Modeling Consortium (iTEM)

Advisory Board Member (previously), International Transport Forum of the OECD, Decarbonising Transport Initiative

Reviewer for *Science*, *Nature*, *Nature Climate Change*, *Nature Energy*, *Nature Sustainability*, *Nature Communications*, *Environmental Research Letters*, *Climatic Change*, *Joule*, *Energy and Climate Change*, *Energy Economics*, and others

Supervisor and mentor to dozens of early- and mid-career staff (including students) since 2011

HONORS & AWARDS (SELECTED)

Gulbenkian Prize for Humanity 2022 (for work on the IPCC 6th Assessment Report)
ORNL Supplemental Performance Award for Paramount Accomplishment (2x: 2022, 2023)
Fulbright Full Research Grant to Germany (US Department of State) *[Declined]*
German Academic Exchange Service (DAAD) Dissertation Grant to Germany *[Declined]*
US National Academy of Sciences Fellowship for IIASA's Young Scientists Summer Program
Ernest E. Hill Fellowship for studying Carbon-Neutral Alternative Energy Solutions (UC-Davis)
Dwight David Eisenhower Graduate Transportation Fellowship (US Dept of Transportation)
Sustainable Transportation Center Dissertation Fellowship (UC-Davis & US Dept of Transportation)
Sustainable Transportation Center's Outstanding Student of the Year for 2010 (UC-Davis & US Dept of Transportation)
Chevron Corporation Graduate Research Fellowship
Achievement Rewards for College Scientists Fellowship (2007-08 & 2009-10)
UC-Davis Institute of Transportation Studies Outstanding MS Thesis Award
Tau Beta Pi Engineering Honor Society Graduate Fellowship
University of Tennessee Chemical Engineering Outstanding Senior Award
Tennessee Society of Professional Engineers Scholarship
