B.S., Physics, May 2007

B.S., Mathematics, May 2007

- WSU Honors College Certificate
- Undergraduate Thesis Topic: Searching for Braneworld Signals in Gravitational Wave Detectors
- Undergraduate Thesis Advisor: Prof. Sukanta Bose

RESEARCH BACKGROUND

Oak Ridge National Laboratory, Oak Ridge, TN: 2023 to present

- Assisting with experiments and development with neutron polarization capabilities, including magnetic Wollaston prisms and resonant spin flippers. Co-organized workshop on the "Scientific Benefits and Applications of Resonant Spin Echo" held in February 2024.

Research Neutron Source Heinz Maier-Leibnitz (FRM II), Munich: 2019 to 2022

- Local contact for assisting users with their experiments at the RESEDA instrument. Responsible for designing and implementing major upgrades to the MIEZE spectrometer arm at RESEDA to optimize it for the requirements of small-angle neutron scattering (MIASANS). These upgrades include: (i) installing new superconducting solenoids as part of the resonant flippers to significantly extend the dynamic range (ii) installation of a new detector on a new translation stage within a vacuum vessel to improve the precision and flexibility of data collection.

Seoul National University, Seoul, South Korea: 2015 to 2018

- Measurement and analysis of neutron and x-ray scattering data on strongly correlated electron systems. Specific focus on two topics: (i) magnon-magnon and magnon-phonon coupling in *multiferroic* non-collinear 2D triangular lattice antiferromagnets and (ii) Effects of interchain coupling on the spinon excitations in 1D *quantum spin chain* systems.

Oak Ridge National Laboratory, Oak Ridge, TN: 2013 to 2015

- Performing inelastic neutron scattering measurements to analyze spin dynamics of iron-based superconductors and strongly correlated electron systems, including topological Kondo insulators and Mott insulators with *frustrated magnetism*.

University of Notre Dame, Notre Dame, IN: 2008 to 2012

- Investigating the nature of interlayer exchange coupling (IEC) in GaMnAs-based multilayers (*utilizing magneto-transport, SQUID magnetometry, and polarized neutron reflectometry*) and establishing under what conditions the IEC between GaMnAs layers is antiferromagnetic or ferromagnetic.

Washington State University, Pullman, WA: 2005 to 2007

- WSU College of Sciences Summer Research mini-grants (Summer 2005 and 2006) for research on the detection of stochastic and braneworld gravitational wave signals with LIGO (Laser-Interferometer Gravitational-wave Observatory).

University of Alaska Fairbanks, Fairbanks, AK: 2004

- REU program grant for atmospheric physics project; modeling noctilucent clouds with Prof. Scott Bailey.

S. McKay, V.O. de Haan, **J. C. Leiner**, S. R. Parnell, R. M. Dalgliesh, P. Boeni, L.J. Bannenberg, Q. Le Thien, D. V. Baxter, G. Ortiz, R. Pynn “*Observation of a giant Goos-Hänchen shift for matter waves*” submitted to Physical Review Letters: arXiv:2407.01190

SKILLS

- Extensive experience with Inelastic Neutron Scattering:
 - Neutron Resonant Spin-Echo (MIEZE–Modulation of Intensity with Zero Effort– technique with the [RESEDA](#) instrument)
 - Time-of-Flight spectrometers (ORNL SNS, USA: [SEQUOIA](#), [ARCS](#), [HYSPEC](#)(polarized). RAL, UK: [MERLIN](#). J-PARC, JP: [4SEASONS](#))
 - Triple-Axis spectrometers (ORNL HFIR, USA: [HB-1](#)(polarized) & [HB-3](#). NIST NCNR, USA: [MACS](#)(polarized) and [BT7](#). ANSTO, AU: [TAIPAN](#))
- Extensive experience with Polarized Neutron Reflectometry at both:
 - Continuous neutron sources (NIST NCNR, [PBR instrument](#))
 - Pulsed neutron sources (ORNL SNS: [Magnetism Reflectometer](#) Lujan, Los Alamos: [Asterix](#))
- Extensive experience with X-ray Magnetic Circular Dichroism (XMCD) ([ANL](#)) and (non-resonant) Inelastic X-ray Scattering (IXS) ([Spring-8](#)) experiments
- Neutron Diffraction experience
- Resonant Inelastic X-ray Scattering (RIXS) experience
- X-ray reflectivity and X-ray diffraction experience
- Magnetometry and Magneto-transport experience
- Programming experience, in order of familiarity:
(Python, [McStas](#), [Mantid](#), MATLAB, Mathematica, IDL, C++)
- Nano-Fabrication and Molecular Beam Epitaxy (MBE) growth experience
- Reading and basic speaking competence in Korean and German (B2.2)
