

Yan-Ru Lin

R&D Associate Scientist | Oak Ridge National Laboratory
Oak Ridge, TN 37830 | liny@ornl.gov | 865-341-0182

PROFILE

Over a decade of research expertise in nuclear materials and electron microscopy. Research focuses on understanding radiation damage effects in neutron and ion irradiated materials primarily using transmission electron microscopy (TEM). Expertise in development and application of aberration-corrected STEM, in-situ TEM, and 4D-STEM techniques.

EXPERIENCE

▪ Oak Ridge National Laboratory, Oak Ridge, TN

R&D Associate Scientist — 2023–Present

Lead international collaborative research on post-irradiation examination of radioactive materials, focusing on the development of advanced characterization techniques to evaluate material properties. Emphasize understanding degradation mechanisms and mechanical property loss in materials for fusion and next-generation fission reactors.

Postdoctoral Research Associate — 2022–2023

Conducted research on radiation effects in nuclear structural materials. Installed the world's first liquid electrochemical cell with electron dose monitoring for in-situ TEM experiments. Pioneered flash polishing for FIB damage-free TEM sample preparation. Developed a machine learning model for automated defect detection, created a novel SRIM-like code for radiation damage calculations, and implemented STEM-WBDF techniques for advanced defect analysis.

▪ University of Tennessee, Knoxville, TN

Bredesen Center Joint Faculty — 2024–Present

Supervise two PhD students and deliver guest lectures in nuclear engineering and materials science.

EDUCATION

Ph.D., Materials Science & Engineering, University of Tennessee, Knoxville (2017-2021)

M.S., Nuclear Engineering, National Tsing Hua University, Taiwan (2012-2014)

B.S., Nuclear Engineering, National Tsing Hua University, Taiwan (2008-2012)

AWARDS

2025	MSTD Protégé of the Year Award	Oak Ridge National Laboratory
2024	R&D 100 Finalists	R&D World
2021	Mark Mills Award	American Nuclear Society
2021	Tickle Graduate Fellowship	University of Tennessee
2021	Professional Promise Distinction Award	University of Tennessee
2020	CMP Graduate Research Support	Tennessee Higher Education Commission
2019	MSE GRA Travel Award	University of Tennessee
2019	MeV Summer School Scholarship	U.S. Department of Energy
2018	Phi Kappa Phi	Honor Society of Phi Kappa Phi
2013	College of Science Elite Student Award	National Tsing Hua University
2012	NSRRC Research Fellowship	Taiwan Synchrotron Radiation Center
2012	Graduate Research Scholarship	Taiwan Bureau of Energy

PRESENTATIONS

1. “Radiation Effects and Microstructural Analysis of Nuclear Materials”, **University of Tennessee**, Knoxville, Tennessee, USA, March 2025. (Invited talk)
2. “Investigation of Microstructure and Mechanical Properties in Cost-Effective Thermomechanically Processed Nanostructured Ferritic Alloys”, The Minerals, Metals & Materials Society (**TMS**) Meeting, Las Vegas, Nevada, USA, March 2025. (Oral)
3. “Radiation Effects and Microstructural Analysis of Nuclear Materials”, **Hokkaido University**, Sapporo, Japan, March 2025. (Invited talk)
4. “Understanding Formation of Irradiation-Induced Defects through 4D-STEM, Electron Tomography, and WBDF-STEM”, Microscopy & Microanalysis (**M&M**), Cleveland, Ohio, USA, July 2024. (Oral)
5. “The Response of ^{11}B Enriched ZrB₂ Ultra-high Temperature Ceramic to Neutron Irradiation at Elevated Temperatures”, The 21st International Conference on Fusion Reactor Materials (**ICFRM**), Granada, Spain, October 2023. (Oral)
6. “Effect of Helium on Cavity Swelling in Dual-ion Irradiated Fe and Fe-10Cr Ferritic Alloys”, The Minerals, Metals & Materials Society (**TMS**) Meeting, San Diego, California, USA, March 2023. (Oral)
7. “Helium Effects on Defect Evolution of In-situ Irradiated Additive-manufactured Grade 91 Steel”, The Minerals, Metals & Materials Society (**TMS**) Meeting, San Diego, California, USA, March 2023. (Oral)
8. “Effect of electron beam water radiolysis on in-situ liquid cell TEM”, Liquid Phase Electron Microscopy Gordon Research Conference (**GRC**), Ventura, California, USA, October 2022. (Poster)
9. “Effect of Cr and He on Cavity Swelling in Dual-Ion Irradiated High Purity Fe-Cr Alloys”, The Minerals, Metals & Materials Society (**TMS**) Meeting, Anaheim, California, USA, March 2022. (Oral)
10. “Formation of cavities in Fe and Fe-Cr ferritic alloys”, The Materials in Nuclear Energy Systems (**MiNES**) meeting, Philadelphia, USA, November 2021. (Oral)
11. “Effect of Helium on Cavity Swelling in Dual-Ion Irradiated High Purity Fe and Fe-Cr Alloys”, The 20th International Conference on Fusion Reactor Materials (**ICFRM**), Online Event, November 2021. (Poster)
12. “Temperature-dependent Cavity Swelling in Dual-Ion Irradiated Fe and Fe-Cr Alloys”, The Nuclear Materials Conference (**NuMat**), Online Event, October 2020. (Poster)
13. “Dynamic observation of dual-beam irradiated Fe and Fe-10Cr alloys”, The Nuclear Materials Conference (**NuMat**), Online Event, October 2020. (Oral)
14. “Void Swelling in Ion-irradiated High-purity Fe and Fe-Cr alloys: Peak Swelling Temperature and Carbon Effect”, The 19th International Conference on Fusion Reactor Materials (**ICFRM**), La Jolla, USA, October 2019. (Oral)
15. “Peak Swelling Temperature in Ion Irradiated High-purity Fe and Fe-Cr Alloys”, The Materials in Nuclear Energy Systems (**MiNES**) meeting, Baltimore, USA, October 2019. (Poster)
16. “Bubble formation in helium-implanted nanostructured 14YWT and CNA ferritic alloys at elevated temperatures”, The Nuclear Materials Conference (**NuMat**), 2018, Seattle, USA, October 2018. (Poster)
17. “Ion-irradiation-induced defect in 3C-SiC characterized by synchrotron radiation-based XRD and TEM”, The 16th International Conference on Fusion Reactor Materials (**ICFRM**), Aachen, Germany, October 2015. (Oral)

18. “The microstructure evolution and point defect-induced swelling in irradiated 3C-SiC”, The 17th International Conference on Fusion Reactor Materials (**ICFRM**), Beijing, China, October 2013. (Poster)
19. “Microstructural evolution of Hi-Niclon Type-S SiC composite under ion irradiation at elevated temperatures”, International Symposium on New Frontier of Advanced Si-Based Ceramics and Composites (**ISASC**), Seoul, Korea, March 2012. (Poster)

PROFESSIONAL ACTIVITIES

1. **Technical Program Committee**, ‘22nd International Conference on Fusion Reactor Materials (ICFRM-22)’, Shizuoka, Japan, 2025
2. **Lead Symposium Organizer**, ‘Microscopy & Microanalysis (M&M)’, Milwaukee, WI, 2025-2026
3. **Technical Reviewer**, proposal review for Nuclear Science User Facilities (NSUF) - Rapid Turnaround Experiment (RTE) program, U.S. Department of Energy, 2024–present
4. **Technical Reviewer**, proposal review for Laboratory Directed Research & Development (LDRD) program, Oak Ridge National Laboratory, 2024–present
5. **Guest Editor**, ‘Materials’, Special Issue: Mechanical Behavior and Radiation Response of Materials, 2024–2025.
6. **Program Committee Co-Chair & Symposium Organizer**, ‘The 12th Vacuum and Surface Sciences Conference of Asia and Australia (VASSCAA-12)’, Taipei, Taiwan, 2024
7. **Symposium Session Chair**, ‘The Minerals, Metals & Materials Society (TMS) Meeting’, San Diego, CA, 2023

MENTORING AND TEACHING EXPERIENCE

1. **Hsujui Chang**, PhD student in Bredesen Center - Energy Science & Engineering, University of Tennessee, PhD advisor, 2024–Present
2. **Jose Tupayachi**, PhD student in Industrial Engineering, University of Tennessee, Co-advisor (with Dr. Xueping Li), 2025–Present

SOFTWARE PROJECTS

- **IRAD** (<https://code.ornl.gov/liny/irad>)
Developed a Monte Carlo simulation program using the binary collision approximation (BCA) to simulate ion transport in materials. Addressed the vacancy overestimation problem in SRIM by implementing replacement energy correction in IRAD. The program accurately calculates vacancies/displacements and implanted ion concentration based on total ion fluence.

PROFESSIONAL MEMBERSHIPS

The Minerals, Metals, and Materials Society (TMS), Microscopy Society of America (MSA), Microanalysis Society (MAS), and American Nuclear Society (ANS)

PEER-REVIEW SERVICE

Acta Materialia, Journal of Nuclear Materials, Microscopy and Microanalysis, Scientific Reports, Journal of Materials Science & Technology, Journal of Materials Science, Nuclear Instruments and Methods in Physics Research Section B.

SKILLS

Microscopy (TEM, SEM, FIB), Materials Characterization Techniques (XRD, APT, Metallography, SAXS, SANS), Mechanical Testing (Tensile Test & Nanoindentation), Accelerator Techniques (Ion Beam & Synchrotron Radiation), Programming Languages (MATLAB, Python, C++)

GRADUATE ADVISORS AND POSTDOCTORAL SPONSORS

1. **Prof. M. Grace Burke**, Oak Ridge National Laboratory (Postdoc advisor); currently at Idaho National Laboratory
2. **Prof. Steven J. Zinkle**, University of Tennessee, Knoxville (PhD advisor)
3. **Prof. Arunodaya Bhattacharya**, Oak Ridge National Laboratory (PhD co-advisor); currently at University of Birmingham
4. **Prof. Ji-Jung Kai**, National Tsing Hua University, Taiwan (MS advisor); currently at City University of Hong Kong
5. **Dr. Ching-Shun Ku**, National Synchrotron Radiation Center, Taiwan (MS co-advisor)
