

Method for the Enhancement of Aqueous Cleaning Operations

Disclosure Number

200000784

Technology Summary

The subject invention is a method for enhancing aqueous surfactant cleaning . It provides significant advantages for industrial cleaning and degreasing operations. It can accelerate cleaning operations and may reduce the need for added chemicals, such as pH modifiers, in cleaning solutions. The present invention will improve the capabilities of aqueous-based cleaning, providing an excellent substitute for solvent-based and semi-aqueous-based cleaning techniques.
