

## Porous Flow Through Electrochemical Emitter for Use with Mass Spectrometry

### **Disclosure Number**

200301324

### **Technology Summary**

The invention is an electrochemical apparatus that is employed as an upstream reactor cell to an electrospray emitter coupled to a mass spectrometer detector, and/or directly employed as an electrospray emitter for electrospray ionization mass spectrometry. The electrochemical apparatus of the present invention provides an improvement in electrospray emitters for coupling to a mass spectrometer detector.
