

## Stack Configurations for Tubular Solid Oxide Fuel Cell with Internal Membranes

### **Disclosure Number**

200401471

### **Technology Summary**

The invention describes two possible solid oxide fuel cell stack configurations. These configurations only use tubular fuel cells comprised of a metallic support structure with internal fuel cell membranes. These stack configurations demonstrate how the stacks will be bundled and the current extracted. They are only 2 possibilities for how the earlier invention may be implemented.
