

## Matrix for Algal Cultivation

### **Disclosure Number**

200802164

### **Technology Summary**

Green algae colonize and grow on a matrix, and remained on the surface of the matrix, allowing easy removal of spent medium and faster algal growth. The matrix offers certain advantages over cotton and other plant-derived matrices due to its special properties. The matrix allows transmission of visible light and is highly hydrated, and has a porous, net-like microstructure.

### **Inventor**

EVANS, BARBARA R  
Chemical Sciences Division

### **Licensing Contact**

CALDWELL, JENNIFER T  
UT-Battelle, LLC  
Oak Ridge National Laboratory
